Two motion pictures depicting the U. S. navy in action were presented at Tuesday's meeting of the Lions club in Hotel Medford by Chief Quartermaster George Patterson of the local recruiting station.

One picture covered a South American tour starting at Venezuela and progressing south around Cape Horn and up the west coast of South America. The other depicted phases of naval work, such as supply, repair, relief and the part they play in keeping the battle fleet ready for action.

Miss Marguerite Luman sang two songs, accompanied at the piano by Kenneth Raymond. Both were very well received by the audience.

Earl Miller was program chairman for the evening.

Closing time for too late to classify Ads is 1:30 p. m.

*Progress just won't let an artery harden*

WE'D LIKE you to meet an old friend of ours named Progress—a constant companion who helps keep us young. With Progress around, there's no chance to sit down in the old rocking-chair and take a nap. Of this we'll give you an illustration.

Only recently we thought our refining methods were every one right up to the latest tick of the clock—and they were. But along came Progress with a new way to produce gasoline from certain petroleum—by using something chemists call a catalyst.

This long had been a theory. Suddenly it was a fact. Progress would have occasioned no greater surprise had he popped up with perpetual motion, the man in the moon, and a cure for the common cold. Yet the catalyst process... several of them in fact... already has taken its place in our refineries.

Its growth will depend on the degree in which it fulfills its promise to make the nation's oil reserves go farther. The point is that the extensive building and rebuilding involved in its adoption is perpetual motion with us. Such development has gone on—forever unfinished—since our beginning. Otherwise we'd still be selling whale-oil.
