

EAGLES BASKETS TO BE FINANCED BY OWN TREASURY

Crater Lake aerie, Fraternal Order of Eagles voted at its weekly meeting in lodge hall at 42 North Front street last night to finance the purchase of Christmas baskets for needy families this year out of its treasury.

In the past the aerie has solicited contributions for the Christmas baskets from merchants but there will be no solicitation this year, said Dr. W. F. Roney, president, after the meeting.

"We want to thank all the business men who have helped us so generously in the past and to let them know that we are glad that the finances of the lodge are in such good shape this year we can appropriate enough funds from our own treasury to carry on this charitable work," Dr. Roney said.

Members of the lodge who know of needy families were asked to turn in their names to the basket committee of which A. H. Banwell is chairman.

Plans were carried forward at last night's meeting for the Eagles dance to be held at Oriental Gardens next Wednesday evening. Music is to be provided by Archie Legg's recording orchestra. Proceeds will go to the aerie's drill team.

After the business meetings last night, the women's auxiliary presented a play and the men of the aerie served a collation for both the men and the women.

APPLEGATE FIRES LATEST ON RECORD

December was ushered in today with two forest fires in the Applegate district of the Rogue River national forest. It was the latest date in the year on which fires ever occurred on the forest, headquarters here said.

Both fires were over the border in California. One was near the Daffodil mine, the other near Oak Flat. Size of the fires had not been reported to headquarters. Cause had not been determined.

The blazes were discovered yesterday afternoon by Lee Port, district ranger. He sent 40 CCC men from Camp Applegate under Foreman Dee Mills to the fires. Mills reported by telephone this morning that the Oak Flat fire had been controlled and that the men were starting on the other blaze. The fire spread slowly and was confined to the ground cover, doing no damage to the yellow pine trees in the area, Mills reported.

November is the month of East Texas' heaviest loss from forest fires.

TO 4-H CONGRESS

GERALDINE deLANCEY, 14, of Corvallis, is named by H. C. Seymour, state club leader, as an Oregon delegate to the 18th National 4-H Club Congress in Chicago, Dec. 1-5, for her general excellence in home economics. In seven years she prepared 369 meals, baked 48 dozen items, canned 3122 quarts of foods, improved 69 articles in her home, made 81 garments, laundered more than 6,000 articles in a homemaking project, planted 43 dozen flowers, and prepared 14 outdoor meals. She also made 90 exhibits at county, state and national shows, and took part in 49 demonstrations, 23 judging contests, and 23 dress reviews to win many honors, and several trips to 4-H events. She values her club activities at \$129.46. Miss deLancey will compete with other state winners for one of six \$200 college scholarships provided by Montgomery Ward, in addition to the trip to Chicago.

Road Mercy

Roanoke, Va. (AP)—Stranded travelers forced to dismount from a disabled bus here were chilled by winter winds but warmed by the spontaneous hospitality of nearby residents. The citizens served the bus passengers sandwiches and hot drinks on the street until the bus company arranged other transportation.

Bear Warning

Berkeley, Calif. (AP)—Even persons hardy enough to kill bears and eat their meat must resort to household precautions or risk death, University of California scientists warn. Like some pork, the university medical school has found, bear meat may be a source of deadly trichinosis. Hunters should cook the flesh thoroughly.

Cooperation

La Junta, Colo. (AP)—High school home economics students wanted to "go goldfish gulpers one better," so they caught a rattlesnake and ate it. Three high school teachers, one a woman, joined the class in a "snake steak" meal after the rattler was skinned and cooked. They said the meat "tasted swell."

White Buffalo

Juneau, Alaska (AP)—One of those million-to-one freaks of nature, an albino buffalo, has been sighted several times with a herd in the Big Delta country south of Fairbanks. Dr. William T. Hornaday, famed conservationist, says probably not more than 10 or 11 white buffaloes have ever been seen by white men.

FINLAND INVASION PROFOUND SHOCK TO PEACE-LOVING

(Continued from Page One.)

the president asked Russia and Finland to pledge before the world that they would refrain from bombing defenseless civilians and undefended cities.

The president's plea was made public shortly after Hjalmar J. Procopo, the Finnish minister, told newsmen Soviet warplanes had dropped bombs on Helsinki and nine other communities in Finland—all of which, he said, were undefended.

The minister also said he had received numerous messages from Americans expressing sympathy for his country and indignation at Russia's invasion.

No Reprisal Plans

At the press conference the president, when questioned, had nothing to say about possible application of the neutrality law to the Russo-Finnish conflict, nor did he comment on whether the United States was considering withdrawing recognition of Soviet Russia.

He did say he probably would discuss the Baltic situation with congressional leaders by telephone but planned no formal conference.

To a question whether Laurence Steinhardt, ambassador to Moscow, would be called to Washington for consultation, the president said he could not answer this. But he explained there was so little information coming in because of communication difficulties by telephone through Estonia and Sweden this country would do nothing until more positive information was at hand.

Asked whether export of warplanes to Russia might be forbidden because of the bombings of civilian populations, the president recalled the notes he addressed early to Russia and Finland asking civilians be spared and said there had been no replies as yet.

Russia Silent

Responding to another question, he also said Russia had not replied to the recent note making available the good offices of the United States in settling the dispute with Finland.

In his message to the Russian and Finnish governments—which read almost word for word like his previous appeal to Germany and the allies—the president asked both countries to avoid a resort to the "inhuman barbarism" of aerial attacks on civilian centers.

Mr. Roosevelt said "the ruthless bombing from the air of civilians in undefended centers of population" recently had resulted "in the maiming and in the death of thousands of defenseless men, women and children" and had "sickened the hearts of every civilized man and woman."

"If resort is had to this form of inhuman barbarism during the period of the tragic conflagration with which the world is now confronted," the presi-

dent continued, "hundreds of thousands of innocent human beings who are not even remotely participating in hostilities will lose their lives."

"I am therefore addressing this appeal to the Soviet government (Finnish government in the message to Helsinki) . . . publicly to affirm its determination that its armed forces shall in no event, and under no circumstances, undertake the bombardment from the air of civilian populations or of undefended cities, upon the understanding that these same rules of warfare will be scrupulously observed by all of their opponents."

"I request an immediate reply."

High officials waited primarily to see what answer would come from Russia, which some authorities estimate was 7,000 military planes. They were confident Finland, with 150 warplanes, would acquiesce promptly.

To Jail Over "Please"

Malden, Mass. (UP)—Donald W. Lovett, 23, when asked why he struck and kicked Herman Dearborn, motor vehicle inspector, replied: "He didn't say 'please' when he asked to see my license and automobile registration." Lovett was jailed.

Watch Out

Salisbury, N. C. (AP)—Railway Detective W. W. Caldwell owes his life to a time-piece that will tick no more. A man, surprised in a freight car, fired two shotgun charges at close range at Caldwell. A heavy watch in the detective's pocket caught the first shot; the second went wild.

Race

Sydney, N. S. W. (UP)—An official of the Orange (N. S. W.) greyhound racing club overcame a problem when a heavy mist swept over the racing ground. He tied an electric torch to the tail of the mechanical hare and the dogs pursued the light.

You Never Know

Denver (AP)—Of all places, Bailiff Norman Cobb thought his lunch would be safest in his desk in the county courtroom. But somebody stole it during a court session.

At the National Capitol With John W. Kelly

(Continued from Page One.)

overshoot their quota and no questions asked. Average age of the government worker is in the 30's.

Before the new deal the average age was higher, but the election of Franklin Delano Roosevelt was the great opportunity for young Democrats. They gathered in Washington like a swarm of bees; were "cleared" through their congressmen, state chairmen, county chairmen, national committeemen and with all these endorsements were appointed to a \$1200 a year job.

Today there are 925,000 government payrollees compared with 563,000 when Mr. Roosevelt was sworn in March, 1933. This for the nation as a whole. Of the present total, more than 300,000 obtained their jobs without taking civil service. When Herbert Hoover left the White House 83 percent of the workers were under civil service.

WASHINGTON, ("the district" is the common expression), cannot house all the people in government, so thousands live in nearby Maryland and Virginia, driving back and forth to work. These cars are parked for miles along the curbs of streets and roadways in the parks. There is no other place for them. When a special rate of five cents a day was proposed in a plan for parking lots, the workers denounced the price as an outrage and a gyp.

Twice As Good?

Roanoke, Va. (AP)—You can eat two varieties of apple and have only one core to throw away as the result of a grafting experiment here. C. J. Price exhibited fruit half Red York on one side and half Grimes Golden on the other, the result

of grafting Grimes Golden shoots on a York tree, plus cross-pollination.

Fights Forest Fires.

Quincy, Cal. (UP)—A one dog fire control unit has been discovered by E. E. Boehm, Plumas national forest district ranger. The dog locates a fire by the sense of smell and arriving at the scene sets to work to control it by digging a line around the blaze.

The members of a "lost tribe" living on Chimney Rock in Ruth-erford county, North Carolina, climb down 750 steps on the face of their rock when they want to shop in the village beneath, then climb back up.
