28 jobs are part of his school days

ALTHOUGH it's not our purpose to outspread Horatio Alger, Jr., that kingpin sweetness-and-light spreader, it becomes necessary to revise a story told some months ago about an employee who started out rolling barrels in a warehouse and held 27 jobs before he "arrived." For our hero has moved up to Job No. 28—as Company treasurer.

* * *

Now somebody may arise in the back of the house and ask "What's that to me, Joe Doakes in person?" Thank you very much, Mr. Doakes. Your query is right to the point. Doubtless you will agree that, however specialized his present post, a man with 27 other well-done jobs under his belt has learned something about the oil business.

* * *

Nearly every executive in our organization has personal knowledge of the other fellow's problems gained in other jobs, other departments, other fields. For Standard this means more efficiency, more understanding, more ease of operation all along the line. For you it means—better gasoline.

* * *

On old-time school desks it used to be cast in enduring iron that "Knowledge is Power." Because of a long-standing policy of promotion, this Company puts knowledge into its products . . . a knowledge which, where you want it so, comes to you as power.
