WEATHER TO RULE USE OF FORESTS OVER WEEK-END

Showers Would Make Camps Too Wet for Pleasure—Angling Generally Good

"If showers continue over the week-end, roads at the higher elevations will be slippery and forest camps too wet for use. The ground dries quickly, however, and a little sunshine would result in pleasant conditions throughout the forest."

"Fishing is generally good. In Rogue river above Union Creek and in Union creek, limit catches are being made with flies. In the same vicinity, Mill Crater, Foster, Flat and Hershberger creeks are all yielding good catches. There have been only a few limit catches at Fish Lake during the past few days. At Hyatt reservoir some bass are being taken with plugs and lures, and crawfish with worms and flies, but most catches have been disappointing."

"At Rocky Point no very large fish are being taken but fair numbers are caught by trolling with Andy Reekers, spinners or flashers. No catches have been reported at Lake of the Woods. Beaver Dam and Little Butte creeks have been good with both flies and worms. Squaw lake continues to be fair. In the Big Applegate river there is some fly fishing, particularly in the evenings, with big gnats, royal coachmen and small spinners. Water is lowering in this district and there should be trout fishing in the small streams in the near future."

New Flowers
"In the Rogue river outside the national forest, the cool weather has caused the water to flow rapidly and it is fine and clear. Best lures have been beaver kill, queen of the water, royal coachman and blue upright. Salmon have come up in large numbers and several have been taken with a large spoon. Steelhead are being caught with number 0 spinners."

"New flowers to appear this week include wild lilac throughout the forest, and the alpine flowers on Hershberger mountain. The Hershberger road is open to the Umpqua-Rogue river divide but is quite rough. The Ashland loop road is still block-

ed with snow between Dutchman peak and Bull gap. No work has been done on the Four-mile Lake road and it is probably impassable."

Closing time for Too Late to Clarity Ads is 1:30 p. m.

BAKER

and Her Silvery Lakes and Treasures of "Gold"

There's gold in Baker's hills . . . and gold in the yellow grains of her fields, and in the big timbers of her Ponderosa pine forests and in her livestock herds and her poultry flocks and her big game reserves and her "silvery" mountain lakes. For example, Anthony Lakes, only thirty-five miles away, bid fair to become a winter and summer resort where skiing is unsurpassed on any "skitway" in America. A \$180,000 ski project, including ski trails and a new lodge, is now under construction.

From Oregon's first gold "strike" in 1861, Baker county has been Oregon's leading producer of precious metals. But Baker county's "pay dirt" is not limited to precious metals. For over 15,000 tons of lignite has been mined. Oregon is used in the refining processes of Baker's own "White Satin" Sugar every year. Also, it produces nearly \$600,000 a year in freight revenue . . . a most important factor to Huntington, Baker, we salute you!

FACTS ABOUT BAKER COUNTY
\$150,000,000 in precious metals have been taken from Baker County since 1861. Farm crops bring \$4,000,000 and lumber payrolls amount to \$2,000,000 annually. One million acres of grazing land furnish pasture for 120,000 beef cattle and sheep. Unlimited scenic-recreational pleasures make it a year-round vacation land.
