

FARMER INCOME FOR NORTHWEST SHOWN FOR 1939

Four States Receive Cash and Federal Help Totaling \$367,963,000 During Yr.

Washington, July 12.—(P)—Cash farm income and government payments poured \$367,936,000 into the four northwestern states in 1939, an increase of \$30,834,000 over the preceding year.

Of the increase, \$18,000,000 was due to larger government payments and \$12,834,000 to a rise in farm income.

Last year Oregon reported cash income at \$102,841,000 and government payments at \$6,818,000.

For 1938 the totals were: Oregon \$100,756,000 and \$2,499,000.

The data published by the bureau of agricultural economics showed that livestock continued to be the big cash producers in the west.

Oregon cash income included the following 1938 and 1939 figures:

Dairying Big Factor
\$13,260,000 and \$14,800,000 from cattle, calves, beef and veal; sheep lambs, mutton and lambs \$5,754,000 and \$6,806,000; wool \$3,325,000 and \$3,718,000.

Dairy products proved to be a good cash producer, Oregon reporting totals of \$18,566,000 in 1939 as compared with \$18,638,000 in 1938.

Turkeys produced cash income of \$3,603,000 in Oregon in 1938, nearly \$300,000 more than the 1939 total of \$3,367,000.

The amounts received for from this source in 1938 and Oregon \$922,000 and \$1,277,000; for eggs \$4,810,000 and \$4,117,000.

Hogs, pork and lard about held their own in the four states last years as compared with 1938. The total cash income from this source in 1938 and 1939 included: Oregon \$4,690,000 and \$4,045,000.

CLEVELAND PAINTINGS OF CRATER LAKE ARE ATTRACTION AT FAIR

Treasure Island, July 12.—(Sp)—Four large paintings by H. S. Cleveland of Medford, descriptive of the origin of Crater Lake national park are proving a notable addition to the Shasta-Cascade Wonderland building's display of outdoor scenes in the Wonderland scenic region of northern California and southern Oregon. These four paintings, made available to the Shasta-Cascade building by Mr. Cleveland through the Jackson County Chamber of Commerce of Medford, are in continuity showing how Crater lake, foremost of the three greatest natural wonders of the world, was formed.

According to scientists, one of the greatest mountains in the world, Mt. Mazama, stood where Crater lake is now. The first painting is the artist's conception of that majestic mountain. Ages ago a great cataclysm occurred. The painting descriptive of this period shows the partial eruption and partial subsidence which were but the beginning of the great convulsion.

The great pit that resulted from the tremendous spasm is shown in the third painting. Small volcanoes arose from the floor of the seething hole and the most prominent is shown still smoldering. This secondary volcano is now Wizard island. Crater lake, as it looked years ago when first discovered by Indians, and as it looks today, is shown in the fourth painting. More than 17 cubic miles of solid rock had disappeared when this lake started.
