

### ROTARIANS TOLD CHANGE NEEDED FOR PROSPERITY

Frank Jenkins Says Wealth Comes From Production, Not Planned Scarcity

"All Wealth Comes from Production," was the subject of an address by Frank Jenkins, Klamath Falls publisher, before the Medford Rotary club Tuesday noon at Hotel Medford. A complete reversal of the present policy of "borrowing against the future," and "immediate discarding of the economically unsound doctrine of scarcity," were urged by the speaker.

As proof of the assertion that prosperity goes hand-in-hand with labor and production, the speaker cited the example of Klamath county. In this area, the dollar value of crops for the period from 1930 to 1935 exceed the value of crops for the preceding five years by two and one-half times. Lumber production likewise increased 40 per cent for the corresponding period. The present high per capita sales

### MISSOURIANS Take Notice

I have been asked to call a meeting of the Missouri people at the Court House Auditorium in Medford, Thursday, July 19th, 1940 at 8 p.m., for the purpose of effecting a permanent organization of Missourians. N. H. FRANKLIN, By Request.

in Klamath county indicate the wealth that this increased production has brought, Mr. Jenkins said.

The fact that this nation has been "waving daisies in her hair and dancing in the dew" is accountable for America's present inadequate defense, according to Mr. Jenkins. "Appropriations alone cannot safeguard this country; money must be translated into battleships, airplanes, tanks, guns and ammunition and that calls for increased production," he said. Bitter post war competition from trade-hungry Europe will tax the resourcefulness of American industry, Mr. Jenkins reminded his audience. Virtual slave labor will mean low prices in world markets and this country can compete only if there is increased efficiency in industry.

Two Great Boons. Two great contributions to human life were the invention of the steam engine, which instituted the factory system in England, and the origination of mass production has brought higher wages, lower prices and more of the good things of life for the people of this nation, Jenkins pointed out.

Concluding, Mr. Jenkins briefly cited some of the limitations and restrictions that have been placed on production and urged that they be removed so that American industry may survive in a highly competitive world after the war.

Preceding the address, the Rev. Herald Gardner entertained the members of the club with an amusing fish story.

### PRESIDENT RESTORES RETIREMENT PAYMENTS

Washington, July 17.—(U.P.)—President Roosevelt today signed legislation restoring retirement payments to approximately 2,000 World War emergency officers who were cut off from those benefits by the 1933 economy act. The measure, which will cost the government approximately \$1,796,000 annually, returns the officers to the emergency officers' retired list.

Sidney, Australia, July 17.—(U.P.)—Clarence E. Gauss, the new United States minister to Australia, arrived

### GOOD PROGRESS BEING MADE IN DEFENSE PLANS

Report From Commission Shows \$1,661,891,494 Worth Contracts Signed

Washington, July 16.—(U.P.)—President Roosevelt gave to reporters today a report from the defense commission which he said exhibited extremely good progress and which showed that the industrial production division alone had let contracts totaling \$1,661,891,494 since June 6.

Mr. Roosevelt got a separate report from each of the seven divisions of the commission at a conference today and then handed copies to reporters.

All Phases Covered. The reports covered all phases of the defense program to date, including such topics as protection of consumers, acquisition of strategic materials, provision of adequate equipment and transportation for troop movements in event of war, the keying of agriculture into the defense picture and training of skilled workers.

A report from the production division, headed by William S. Knudsen, said the contracts cleared since June 6 were divided \$1,390,375,404 for the navy and \$271,516,089 for the army. The deliveries under the contracts, coming from plants from Maine to California, will give the nation improved fighting equipment of all types.

The contracts, Knudsen informed the President, cover planes, tanks, battleships, ammunition, anti-tank guns, anti-aircraft searchlights, machine guns, tractors, trucks, clothing, machinery, airport construction, barracks and other essential items.

Bottlenecks Solved. Furthermore, Knudsen reported, "evidence has been developed indicating progress toward solution, for the time being at least, of the bottlenecks in the machine tool industry."

Edward R. Stettinius, Jr., for the materials division, informed the chief executive that "substantial supplies" of strategic and critical raw materials were being acquired. Whereas the country always has depended on imports for rubber, he said, it is expected that by the end of the month a plan will have been worked out for supplying in any emergency, "most of our needs through the manufacture of synthetic rubber."

Stettinius advised the President of concentration on the problem of producing high-octane gasoline for airplanes to assure adequate supplies. Plans are under way, he said, for storing large quantities of this gasoline at strategic locations under ground. This, the President commented, will be something new.

Training Planned. Sidney Hillman, chief of the labor supply division, said his organization, emphasizing plans for training skilled workers, already has between 30,000 and 40,000 enrollees receiving training designed to enable the defense commission to meet any demands for workers arising from the defense program.

Determination of the effects of the rearmament campaign

on the nation's price structure has been the object of the primary efforts of the price stabilization division under Leon Henderson.

"Analysis of both the materials and resources have been coupled with consideration of measures for control and price stabilization," Henderson reported to the chief executive. "Numerous proposals for price regulation are being studied."

The agricultural division, directed by Chester Davis, is working on the problem of locating plants for defense production so as to utilize surplus labor, particularly in agricultural areas, to avoid "uneconomic concentration of industry."

Miss Harriet Elliott, in charge of consumer protection, said her division had laid the groundwork for an extensive educational campaign to "mobilize public sentiment behind the idea that the civilian population must be prepared physically to meet defense responsibilities placed upon it by an emergency."

From Ralph Budd, of the transportation division, the President received word that specific recommendations have been drawn up for the acquisition of "very substantial numbers of special rolling stock for handling troops and their equipment."

### SHARK BECOMES IMPORTANT FISH

San Francisco, July 17.—(U.P.)—The demand for vitamin A oil taken from shark livers has made the shark one of California's most important commercial fish during the past two years, the California division of fish and game reported today.

Statistics released by Robert D. Byers, fisheries researcher for the division, showed that more than 9,000,000 pounds of shark were taken from the waters of the state during 1939. Sharks became prominent in the 1937 catch because of their vitamin-bearing oil, and by 1938 they were ahead of salmon, albacore and rock fish in pounds landed, the division said.

### IDAHO'S POTATO CROP INCREASES 4 PER CENT

Boise, Idaho, July 17.—(U.P.)—Idaho's 1940 potato crop will be about 4 per cent larger than last year's and will total about 29,760,000 bushels, the agricultural marketing service forecast today. Approximately the same amount of acreage was planted this year but yields per acre are expected to be higher.

### FEDERAL GOVERNMENT ALLOTS BOARD FUNDS

Salem, July 17.—(U.P.)—The Oregon state board for vocational education has been allotted \$55,414 of federal funds for the period of July 1 to December 31, 1940, it was learned here today.

The grant may be used for vocational agriculture, trades and industries, home economics, distributive occupations and teacher training.

### Globe Mills Sold.

San Francisco, July 17.—(U.P.)—Purchase of the Globe Grain & Milling company of California by the Pillsbury Flour Mills company was announced today. The Globe properties include mills in San Francisco, Los Angeles, Sacramento and Ogden. They will be operated as a separate division of the Pillsbury company.

Logner Killed. Baker, July 16.—(U.P.)—Harland John Boyer of Lake Creek, was killed almost instantly yesterday on the west fork of Big creek when a log rolled unexpectedly at the Roy Stoddard logging camp, at which he was employed.

Takes Lucky Nap. Salisbury, Md.—(U.P.)—Benjamin Evans, a transient, was lucky in picking the wrong train. He went to sleep on the southbound tracks here and was awakened by police shortly after the northbound train passed without even disturbing him.

62 SECONDS TO PORTLAND'S CITY CENTER. Close to Business, Theater, Shopping, Government, Garden, surroundings. Excellent "V.I.P." service with both air and auto. \$200 AND UP.

St. Andrews hotel. 1 W. BROADWAY AT COLUMBIA PORTLAND

### INSURANCE FIRM SAYS BURGLARS EARLIER IN WEST

Survey Shows They Operate Mostly at 9 p.m. in East; 2-5 p.m. on Pacific Coast.

Hartford, Conn., July 17.—(U.P.)—If burglars are going to enter your house the chances are they will do so around 9 o'clock in the evening, unless you live in some west coast community, a Hartford insurance company (Aetna) reported today.

A survey conducted by the company in 47 cities showed

that more burglaries occurred between 8 p. m. and midnight than at any other time of the day, with 9 p. m. being the hour most favored by prowlers.

For some reason which the company did not attempt to explain, burglars operate earlier in the far west. San Francisco reported more breaks between 2 and 5 p. m. than at any other time, and Los Angeles and other western centers found the majority occurring between 6 and 8 p. m. This goes for Honolulu, too.

The majority of the police reports studied during the survey contained the phrase "family away for the evening," and "family away overnight" or "family away on vacation" also was common.

The company said it was a "wise extravagance" to leave at least one light burning in a home vacated for the evening.

### MISSING CRAFT FOUND WRECKED

Juneau, Alaska, July 17.—(U.P.)—The mystery of a fishing boat which disappeared six years ago between Sitka and Wrangell has been cleared up.

Nearly covered with drifting sand, the craft, carrying the license number 1028, was found in the grass a quarter mile from shoreline on an isolated beach at Tagat, on the Gulf of Alaska.

Call Us On Your Electrical Problems When Others Can't Fix Them. Medford Electric. Basement Medford Bldg. Phone 90

the customs office was notified today.

A skeleton found on board was identified from papers as the remains of Albert Tausch, 29, who was on the boat.

The craft must have been driven from ashore by a terrific storm, fishermen said.

### Lemon Juice Recipe Checks Rheumatic Pain Quickly

If you suffer from rheumatic, arthritis or neuritis pain, try this simple inexpensive home recipe that thousands are using. Get a package of Ru-Ex Compound today. Mix it with a quart of water, add the juice of 4 lemons. It's easy. No trouble at all and pleasant. You need only 2 tablespoonfuls two times a day. Often within 48 hours—sometimes overnight—splendid results are obtained. If the pains do not quickly leave and if you do not feel better, Ru-Ex will cost you nothing to try as it is sold by your druggist under an absolute money-back guarantee. Ru-Ex compound is for sale and recommended by Western Thrift Store and good drug stores everywhere.
