Ye Smudge Pot

School bells will ding-dong tomorrow, and many kids will say Ding-Dong it!

E. Ulrich, the Skookum Prairie mt.-wm., enjoyed the state fair and the rain at Salem the past week.

The Dub Watson boy Edd, has severed connections with H. Flewber, the demon baker, to pursue an education.

Fleeth Fish, the boom-day tenor of Phoenix, Tues. claimed something could be bought for a song—even one of his own.

Joe Fliegel, Jr., has been in bed with a bad leg, but is coming along OK now. Hello, Joe!

It looks like this neck of the woods would get through the coming election without voting for or against the fish in the Rogue.

Next Fri. will be the first Friday the 13th, in a long time. Peoria Bill Gates left Thurs. for his old stamping ground in Illinois, where he will do some stamping.

The weekly pull-and-hauls will be resumed at the army tomorrow night, and some new faces grimace.

The Elks tom-cat has returned from the hospital, where a cranial rising was whacked off, and he feels like a new cat.

Hunters have started greasing up their firearms for the elusive deer, after the 20th.

The high peaks were whitewashed with the first snow of winter, the first of the week. Now is the time to remember an empty woodshed is worse than a gas tank in the same fix.

A. Butler skinner up to the top of Mt. Thielsen last Sun. One of his heels went bad on him.

Dewey Hill, the Prospect hired man, yelled his third game of bridge Thurs. eve. For leading the wrong ace, he was barked on the shin.

Signs of fall in the residential areas, are juveniles playing football on the lawns, with more gusto than they will when raking up the leaves thereon later.

A Young Democrat, who won't be old enough to vote until the Indispensable One runs for a 4th term, settled all the foreign and domestic problems in the city park forum Thurs.

Rural residents report everything not nailed down has started disappearing in the night except the potatoes, unless they are dug.

The pull-and-haul will be resumed at the army tomorrow night. A number of new necks will be on hand for twisting.

Memorial Service. Portland, Ore., Sept. 7.—(P) —A memorial sermon honoring Dr. and Mrs. Robert C. Grieve, killed in a recent Italian aerial raid near a Sudan mission, will be preached by Dr. Albert G. Johnson at Hinson Memorial Baptist church Sunday.

War Contracts. Washington, Sept. 7.—(P) —Award of army contracts totaling \$13,593,919 was announced today by the war department, including Portland Woolen Mills, Portland, Ore., blankets, \$130,095.

One Mail Tribune want ad.

It Is a Crusade

PRACTICALLY all crusades have a common defect, —amateur leadership. This is true all the way back to the Middle Ages.

And there is an obvious reason. The professionals don't work unless they are paid for it,—or are convinced there is a pot of gold at the end of the rainbow, if and when they reach it.

The crusader on the other hand scorns filthy lucre. He finds his satisfaction in other directions, and more lasting ones. He has an ideal the attainment of which is worth far more to him than any financial gain.

And he wants no monetary reward if he reaches it. Sometimes, of course, he doesn't reach it. Even so his disappointment is never as keen or complete as the professional's disappointment, for he has the spiritual satisfaction of having fought the good fight in a cause he knew to be right.

WELL, believe it or not this Wendell Willkie campaign IS a political crusade. It started as one at Philadelphia, it will continue as one, whether the Old Guard professionals like it or don't.

Already these Old Guardians are complaining. When they call on the Republican candidate, they receive no promises of post offices, ambassadorships or undercover "handouts." Their assistance is welcomed, their advice carefully considered, the atmosphere is entirely hospitable and courteous.

But the old "army game" is out. Wendell Willkie was nominated over the opposition of the professionals because the people wanted him. He is going to be elected that way, or he is going down to defeat.

WE know General Johnson and other veteran politicians, greet such a pronouncement with a sneering and cynical horse-laugh. It is true, nevertheless.

Mr. Willkie is deadly serious about this and so are the mass of his supporters.

If the Presidency of this country, can't be secured without, directly or indirectly BUYING it, then Wendell Willkie and his supporters,—don't want it.

YES this is Quixotic, idealistic, and from the professional politician's standpoint, suicidal, but we are not so sure this particular time, the political "wise guy" is right.

The winner in November is going to be the candidate who gets the independent vote, and unless we are greatly mistaken the Independents are, as a whole, going to turn with relief from "four more years of Roosevelt" to this entirely new and sorely needed type of man in the White House!

Only time will tell. But the genuine crusade has this undeniable advantage, what it loses in seasoned leadership, it gains in enthusiasm and the steady growth of popular support.

On the Spot

WE doubt if American opinion has ever changed as radically and rapidly, as has been the case since the fall of France.

Before the defeat of France the strongest single sentiment in this country was against ANY involvement in the war in Europe. Today if we diagnose public opinion correctly, the strongest single sentiment is to prevent the defeat of Great Britain and its fleet,—no one wants war, but if the British fleet can't be saved without it, no one is going to seriously object.

And the sooner effective aid is given England, the better,—for it is generally recognized that as far as the totalitarian menace is concerned, England is now our first and only line of defense.

Even so, we doubt if many people realize just how serious the situation from the American standpoint, really is.

EVERY day, for example, it becomes more and more apparent that Japan intends to grab the Dutch East Indies, while the grabbing is good.

Such action would put our state department so directly on the spot, that there would be no retreat. It would be war,—or else. And Uncle Sam has never yet adopted the latter course.

There is also no secret about the fact that to get a two-ocean navy will require five or six years at least, yet in case of war with Japan and the defeat of Britain where would we be without one!

The one bright spot in the picture continues to be the gallant and surprising resistance of the British on the sea and in the air. As long as that continues unbroken Uncle Sam is safe.

Another King Falls

THE surprise is not that King Carol of Rumania has finally abdicated, but that he hung on to the post so long.

The reprobate ruler demonstrated that with all his faults,—and they were legion,—he was something more than a play-boy dipsomaniac.

With Germany on one side, and Italy on the other, with his record as an allied sympathizer well known, Carol revealed a genuine shrewdness, resourcefulness and ruggedness of character, which was a credit to him and must have been a great surprise to his nightclub friends.

No one would ever accuse him of being an admirable, or even a respectable character.

But at least he did retain some kingly qualities, and stuck to his guns, until all hope of successful resistance was over.

Dictator Antonescuc is hailed as a "strong man." But as long as the axis holds he will probably only be as strong as Messrs. Hitler and Mussolini want him to be!

Personal Health Service

By William Brady, M. D.

Signed letters pertaining to personal health and hygiene, not to disease diagnosis or treatment, will be answered by Dr. Brady if a stamped self-addressed envelope is enclosed. Letters should be brief and written in ink. Only to the large number of letters received only a few can be answered here. No reply can be made to queries not conforming to instructions. Address Dr. William Brady, 265 El Camino, Beverly Hills, Calif.

MODELLING THE BUST

A young woman writes that she is well proportioned in general but flat-chested. She has tried special exercises and massage, but thinks she may not have done the exercises or applied the massage correctly. Pope was a right about hope—it springs eternal in the human breast, and if the breast is that of a female the hope is tinged with gullibility.

Breasts, that is, mammary glands, exist in the male in a rudimentary state. Not rarely one or both breasts in an infant shortly after birth are enlarged, inflamed and may secrete a milky fluid for several days. This peculiar occurrence usually calls for no treatment—best cure is to let it alone. Again at puberty (early teens) one or both breasts of a boy may swell painfully, but if let strictly alone this usually subsides in two or three weeks.

Mere fullness or unusual prominence of breasts and nipples in stout men is usually due to excess adipose and fibrous tissue. Occasionally the male breast develops a benign tumor or a cyst or even a cancer. Treatment for these is the same as for the same conditions in the female breast.

The breasts of a virgin are hemispheres rising from the front and sides of the chest, four or five inches in diameter at base, having conical nipples of pinkish, brownish hue and wrinkled and perforated by 15 or 20 orifices—mouths of the lactiferous (milk conveying) ducts. Surrounding the nipples is an areola or ring of pigmented skin having a rosy hue. While the virgin breasts are ordinarily soft yet firm mounds if the girl is healthy and in a state of good nutrition (this does not mean merely that she gets enough to eat but rather that her intake of nutritive materials is well balanced—particularly in respect to the proportions of vitamins and minerals) they may become flabby and sag or joggle about when she moves. However, a certain amount of vibration of the breasts with movements of the body is normal and attractive. Neglect of systematic exercise—such as the movements of the Last Brady Symphony to be described later, and the keep-trim routine outlined in The 7 Keys to Vite—explains why the virgin

to remain mute when political issues are at stake, and it is even intimated that occasion may be found for a cross-country journey that will take him to the Pacific coast.

By Frank Jenkins.

INCREASING fleets of German planes are pounding England—recalling that on Friday, as these words are written, only NINE DAYS remain before September 15, the date set by Hitler to march up the streets of London.

He may do it, but he'll have to hurry.

THIS is the point: When you make brags and CARRY THEM OUT, as Hitler has done so far, you gain prestige. When you make brags and fail to carry them out, you LOSE prestige.

When Hitler starts losing prestige, his troubles will begin.

CAROL of Rumania abdicates and flees into exile, and his 18-year-old son Mihai takes over. Today's (Friday's) dispatches tell us:

"Wildly celebrating crowds are sweeping through the streets of Bucharest and gangs of Iron Guards (Rumanian nazis) are roving the city, beating Jewish shopkeepers."

WHY are the crowds celebrating? Their LEADERS hope, in the toppling of the existing regime, to GET SOMETHING GOOD FOR THEMSELVES.

Why are the Iron Guards beating Jewish shopkeepers? They want FOR THEMSELVES what the Jews have worked for.

IN THESE tragic upheavals throughout the world, there is so much selfishness and greed and SO LITTLE real patriotism and service to humanity.

IF ONLY some genius imbued with the idea of REAL PATRIOTISM could arise and sweep the nations at the power-seeking conquerors have swept them from time to time, what a godsend it would be!

(One of the world's great plights is that natural leaders of men who in the beginning do have a vision of service to humanity are so often led astray by the growing itch for personal power.)

THE scientists are learning much about glands. If they could only locate the gland that secretes the hormones (or whatever it is) that generate greed and suspicion and hatred and itch for personal power at whatever cost, and then REMOVE THIS GLAND, what a boon it would be for humanity as a whole!

THE CAPITAL PARADE

By JOSEPH ALSOP and ROBERT KINTNER

(Continued from Page One.)

a series of radio addresses from the White House.

ONE of Willkie's chief problems of course, is that he is in fundamental agreement with the president on most aspects of the major issues before the country—the issue of war policy. He is too attached to his convictions to belie them with careful silence, or with the kind of purely partisan attacks which might aid the isolationist groups to the basic Republican strength.

Even his most ardent supporters are willing to agree that he has been forced to say "me too" rather often, while the president, who once feared that Willkie would take the ball away from him on the war issue, has lately told men close to him that he is pleased with the way matters are developing.

To be sure, another course was open to Willkie on the war issue. In the matter of conscription, for example, he had an excellent opportunity to beat the president to the draw, expressing his convictions on the subject earlier and more forcibly than his rival, and mocking the president for his lack of daring.

Again, in the matter of the destroyer, he was offered the opportunity to join with the president to the extent of issuing a statement simultaneously with the announcement of the destroyer deal, declaring he had knowledge of it and approved it. This would, of course, have allowed

him to share the center of the stage with the president in a highly dramatic episode.

THE advantage to Willkie of such a course was clearly pointed out to him at the time. It was also thoroughly understood in the Roosevelt circle. While the president was then nervous enough of public opinion to wish to take the destroyer matter wholly out of politics, such advisers as Attorney General Robert H. Jackson strongly opposed joint action with Willkie at the cabinet meeting at which it was discussed.

But certain men close to Willkie maintained that the scheme for joint action was inspired by the White House, which was untrue, and that it was therefore planned as a trap, which was also untrue. And Willkie, naturally suspicious of the president, accepted the warnings of these men.

IN short, it is both true that Willkie's stock has slumped, and that he has thus far failed to make the expected showing as a dashing campaigner. Nevertheless, the happy confidence of the president and the men around him still seems extremely premature. If Ed Kelly and other Roosevelt leaders have been taking polls and hoping for ground swells, so have the Willkie-ites. And the Willkie-ite polls show results precisely opposite to the polls of the Rooseveltians.

Willkie still appears to have two great advantages: neither of them much discussed or exploited. He has not yet touched on the principal issue he proposes to make against the president, that he can prepare the national defense more rapidly, and administer the government more efficiently than is now being done. Both these issues have tremendous pulling power, as the third term issue may also prove to have. And he has not yet embarked on the campaign trips from which all his advisers hope great things.

One of the most convincing Willkie-ite polls shows large increases in Willkie strength in almost all areas he has personally visited. If this phenomenon is repeated when he begins campaigning, and if he handles his issues as forcefully as he is equipped to do, his opponents may be smiling on the other side of their faces when November comes.

the \$75,000 sale of furnishings of the Bienville hotel here twice to Louisiana State university. He was given a prison term of 30 months and fined \$2,000, which he was appealing. Four other political figures were convicted with him.

A note left to a son, Jack, 21, said, in part: "Take the family out of the city, because I think this is the best way out." He is survived by his widow, two sons and two daughters.
