RHEUMATISM
Cold weather is always a menace to those who suffer rheumatism. This is because cold climates demand more vitality to keep the body functioning and thus makes weak nerves more susceptible to congestion from being chilled.
Rheumatism has been treated from various angles: as to cause, but Chiropractors have shown that when pressure on weak nerves has been removed the cause of the suffering has also been found and the symptoms disappear. In the early history of Chiropractic, neuritis and rheumatism were two of the most common ailments handled by Chiropractors. Because of the remarkable results obtained in these cases, Chiropractic began to grow rapidly. Chiropractic is always indicated in neuritis and rheumatism and if adjusted early responds readily and completely.
