"The Shark Woman" Here Thursday

The "shark woman" frees her lover from the coils of a deadly python in the sensational real-life nature adventure film, "The Shark Woman", which opens a three day run tomorrow at the Rialto theatre. Actually filmed in the Indian ocean and totally unlike any other adventure film ever brought to the screen, "The Shark Woman" tells a story of native lore as lived on one of the many shark-infested islands in the Indian ocean. The scenes filmed in this picture make the efforts of both the late Martin Johnson and Frank Buck look like sissies at a tea party.

There will be no raise in prices and the added feature will be "Pirates on Horseback", starring William Boyd as Hopalong Cassidy.
