Careless Kitty

Portland, Nov. 7.—(P)—All nine lives of a careless tomcat went up in a shower of sparks last night as the animal ambled onto a 11,000-volt transformer in an outdoor distributing substation in northeast Portland. Lights were out briefly in a widespread area.

"To be prepared for war is one of the most effectual ways of preserving peace . . ."

When George Washington spoke these words the world was a much smaller place. Transportation and communication facilities were such that it took considerably longer for anything to happen than it does today.

But there are certain thoughts that were as true then as they are now. This "preparation for war for the preservation of peace" is

one of them. That is why the United States is hurrying to make itself the strongest nation on earth.

Your newspaper plays an important part in the preservation of peace by keeping its readers informed of their country's progress in preparation of war. Under the freedom guaranteed it in the Constitution, the American Press fearlessly voices the sentiments of the American people.
