Dinner Party At Fabrick Home Given Visitor

Mrs. Margaret Fabrick entertained Wednesday evening with a dinner party at her home on Crater Lake avenue, honoring Miss Hazel Cook, visiting Zontian from Portland. Present were members of the board of the Medford branch of Zonta International and some of Miss Cook's personal friends, who are members of the Medford club.

Following dinner, the visitor, who is here in an advisory capacity with the telephone company for a short time, spoke to the group, offering some interesting suggestions for Zonta projects, gained from the Portland and Salem clubs.

At the meeting, which followed, two new members were elected to the board, Mrs. Fabrick and Miss Phyllis Swearingen.

Plans were made for the annual Zonta Christmas party which will be held Monday evening, December 8, at the home of Miss Swearingen. The arrangements are in charge of the fellowship and program committees.

More than three billion pounds of barley, corn, rye and rice, 150 million pounds of sugar and 163 million gallons of molasses went into making of alcoholic beverages in U. S. in 1939.

Because the ranks of the U. S. marines have expanded so rapidly, only khaki for summer wear and forestry green for winter are worn by most of the sea soldiers.

Oulachons, small fish found only in Canadian waters off British Columbia, are sometimes called "candlefish" because of a candle-like brilliance after they have been dried.

AMERICANS FACE HEAVY SACRIFICE IS ERB WARNING

(Continued From Page One)

by taxation, Dr. Erb stated, and said that the people of this country must be prepared for sharp increase in taxes. England's income tax begins at 25 percent on the lowest incomes and increases to 97½ percent on the highest. "There are only

about 100 people left in all England with a net income of \$20,000 or more a year. The millionaire is a thing of the past," he said.

The remainder of the cost of the war is financed by excise taxes and the sale of bonds, Dr. Erb said, and pointed out that even under this extreme taxation people have money left to buy bonds because they are permitted to buy only necessities.

"America's main problem will be to increase production," Dr. Erb continued.

Labor Awakening
Discussing the labor situation, Dr. Erb said he was beginning to feel more cheerful about labor problems and believed that

the average laboring man was awakening to a real sense of public responsibility. He said he believed that it would be unwise to entirely prohibit the right to strike, even in defense industries, but that unions should be forced to mediate their differences with employers and that they should be prevented from calling strategic, political or jurisdictional strikes for the present. Dr. Erb added that in his opinion unions should be regulated by the federal government along the lines of registration, auditing of accounts and elections.

Inflation Problem
Inflation is another of our main economic problems, the speaker said, and added that a

good taxation set-up, preferably a graduated income tax along the English plan, was the best manner of controlling inflation. This, combined with defense borrowing in the shape of bonds, not only has a desirable stabilizing effect during the crises but carries this effect over into the post-war period.

The speaker ended his talk on a cheerful note, saying "This nation can meet its problems and still maintain its democratic ideals and institution." Dr. Erb opened his talk by praising the work of the League of Women Voters. He read a recent editorial from the New York Times which commended the New York league for its work.

Dr. Erb was introduced by Mrs. Leonard Carpenter, president of the Jackson county branch.
