

Aluminum Mill Near Portland May Move Further From Coast

Portland, Ore., Jan. 2.—(P)—Senator McNary (R., Ore.) was quoted by the Portland Oregonian today that the army and navy wanted an aluminum rolling mill, just getting under construction at Fairview, Ore., removed 400 miles inland. The senator told the newspaper in a telephone conversation that he had opposed the removal and that "I don't think it's lost to Portland yet." He said no decision had been reached on where the official

wanted the \$20,000,000 plant moved, adding that Spokane, Boise, Salt Lake City, Denver and other cities had been proposed. McNary said army-navy admission that they didn't want a plant within 400 miles of the coast was "an admission that we're afraid of the Japs."

DI GIORGIO FRUIT ABSORBS 4 LINKS

San Francisco, Jan. 2.—(AP)—Di Giorgio Fruit company announced today the absorption of its four principal subsidiaries—Earl Fruit Co., International Fruit Corp., Klamath Lumber & Box Co. and Baltimore Fruit Exchange. Operations of the former subsidiaries, Di Giorgio officials said, would be carried on by the parent company, using division management intact.

SENTENCE SPIES TO PRISON TERMS

New York, Jan. 2.—(P)—Prison sentences ranging up to 20 years were imposed today on 33 members of a fantastically-operated spy ring which networked the world in gathering and delivering all kinds of military, commercial and industrial intelligence to Germany. Judge Mortimer W. Byers, sitting in Brooklyn federal court where 14 members of the ring were convicted of espionage De-

ember 12 after a 14-weeks' trial, sentenced them and 19 others including three women who previously had pleaded guilty. They were charged specifically with failure to register as agents of the German reich and with conspiracy to deliver vital American defense secrets to Germany. Maximum possible sentence on the two counts was 22 years. Aurora, N. Y.—(UP)—An Oriental rodent, known as a hamster, is being studied at Wells college here and it may replace the white rat for experimental purposes. The specimen is said to mature faster. Six students are working with six baby hamsters born in the laboratory.
