Action came on a motion of Senator La Follette (Prog-Wis), to return to conference a military pay adjustment bill and to accept house amendments.

La Follette's motion was adopted after Senator Austin (R-Vt) had filed a conference report outlining a compromise proposal agreed upon by a joint senate-house committee. This compromise would have fixed the minimum pay at $46, with first class privates and others of equal rank receiving $52.

HEALTH and LIFE

Health is a state resulting from the normal action of all the physical organs and functions of an organism in accordance with the laws of its being. Normal action for a living organism is action in an easy, free, and regular manner. Life and health are proportionate to each other. The fullness of life is dependent upon perfect health. The indwelling life equals the state of health. Your value of life may be measured by your value of health. Health is your richest possession for by it is meted out your measure of life. Our capacities for accomplishing, enjoying and helping are proportionate to the vigorous, wholesome life energies. It is foolish to trifle with health, although this practice is quite universal.
