

AUTOISTS ASKED TO GIVE UP MATS

Salem, July 10.—(AP)—Secretary of State Earl Snell proposed today that automobile owners contribute the rubber mats in

their car trunks to the scrap rubber drive. Snell said he would ask the state board of control, of which he is a member, to order the mats taken out of all state-owned cars. "Many tons of rubber in Oregon could be collected that way," Snell said after giving his own mat, "and those mats don't serve any useful purpose any way."

DRAMA PROGRAM FOR USO CENTER MAKES PROGRESS

Following the Russian evening, the drama department will plan programs honoring in turn each of the other United Nations now engaged in the war effort. Playlets are already being considered for a Chinese evening and a Dutch evening planned for the near future.

A meeting of Little Theater people is held every Friday night at 229 N. Bartlett at 7:30. Those interested are invited to attend.

SHERIFF WILL SEE GAMBLING DEVICES ARE ALL BANISHED

Strict compliance with the order banning mechanical gambling devices in Jackson county, effective next Monday noon, will be invoked Sheriff Syd I. Brown said today. Failure to do so will bring prosecution under the gambling laws and confiscation of the machines. Sheriff Brown said he anticipated no evasions as all of the dealers and operators had been advised of the order at a conference.

The ban was ordered by Governor Charles A. Sprague upon a request of Major General John L. DeWitt, commanding the ninth corps area.

Prineville, Ore., July 10.—(AP)—Prineville's slot machines were absent today in the wake of a raid by state police yesterday in which 21 machines were confiscated.

Ten owners paid fines of \$5 each but were allowed to keep the money in the machines. Justice Percy R. Smith cited an opinion from the attorney general's office and added that the machines had been in operation with at least tacit approval of officials.

Japanese Quarters At Newell Center Given Insulation

Klamath Falls, July 10.—(Spl.)—Interior walls and ceilings in quarters occupied by evacuees of Japanese descent are being insulated with sheetrock at the War Relocation Authority's Tulelake project.

Seven crews, each of 18 evacuees, are engaged in installing the composition insulation.

Concrete was poured yesterday for the foundation of a 37 by 168-foot building which will house plumbing, electrical and carpenter shops, as well as shop classrooms for pupils.

Carpenter work began today on a heavy equipment motor shop. This structure, also 37 by 168 feet, will shelter machine, blacksmith, tool, and welding shops. Tractors, trucks and other motor equipment will be serviced and repaired in these shops.

The buildings are being erected by evacuee labor under the supervision of WRA engineers.

CHAPLAIN SPEAKS AT HOSTESS MEET

Also attending were other volunteer workers of USO. Following Major Rein's talk a round-table discussion was conducted by Mrs. Helen Small, director of USO, on duties of the workers.

Major Rein gave an interesting account of his own duties as an army chaplain and brought before the group some of the many problems which confront hostesses in USO work. He said that if the army and community work together for the best interest of both that the spiritual as well as moral welfare of the soldiers will be taken care of.

FOURTH SPRAY IS DUE IN ORCHARDS

The fourth cover spray should be completed on July 20, according to L. G. Gentner, entomologist Southern Oregon Experiment station and C. B. Cordy, assistant county agent. The agent's statement follows:

"Use quarter pound colloidal 77, three pounds of arsenate of lead and one quart of stove oil per 100 gallons. Add in order listed in quick succession to partly filled tank with agitator running. With astringent lead, use quarter pound of multifilm instead of colloidal 77."

"Two-spotted spider mite are now in evidence in some or-

chards. Unless control of this pest can be delayed until time to apply the fourth cover, a special spray is desirable. Under present conditions, however, except where worms are a serious problem, a combination oil lead arsenate spray should be applied as soon as spider injury shows need of control.

"For the combination spray use 1 1/4 gallons of light or light medium summer oil and three pounds of arsenate of lead per 100 gallons."

The first cathedral in the western hemisphere was built in Santo Domingo in 1512.
