## Eleven Killed In Eastern Flash Flood

Violent flash floods rolling through north central Pennsylvania and New York took at least 11 lives and damaged or destroyed hundreds of homes, business establishments and industrial plants. At Bradford, Pa., (above), merchants lashed a 20-foot telephone pole to a lamp post to keep debris from swirling into Bradford's main street stores.

## BIDDLE ASKS BAN ON MUSIC UNION HALTING RECORDS

Washington, July 24.—(AP)—Attorney General Biddle today authorized an injunction suit under the anti-trust laws to prevent James C. Petrillo, president of the American Federation of Musicians (AFL), from prohibiting union members from making recordings for radio and other non-private use.

The date and place where the bill of complaint will be filed was not announced, but a justice department official said that it would be either in Chicago, Petrillo's home, or in New York, headquarters of the Musicians union, which also will be made a respondent.

A little earlier the federal communications commission called upon Petrillo and the National Broadcasting company for a "full statement of the facts" regarding the recent cancellation of a broadcast by the National High School orchestra from Interlochen, Mich.

The broadcast was cancelled by NBC, at the request of Petrillo, who contended the amateur orchestra took work from professional musicians.

Petrillo notified manufacturers of transcriptions and phonograph records on June 25 that their licenses from the Musicians Federation for the employment of union members in the making of musical recordings would expire July 31, and that thereafter AFL members would not be permitted to play for recordings, transcriptions or any other form of mechanical reproduction of music.

## MINING ENGINEER ASKED TO SURVEY COAL FIELD HERE

George Watkin Evans of Seattle, foremost coal mining engineer on the Pacific coast, has been appointed principal consulting mining engineer for the coal division of the U. S. bureau of mines, and assigned to the investigation of the Coos Bay coal field.

Mr. Evans has been in Portland conferring with officials of the Bonneville Power administration, the U. S. bureau of mines regional office, and the state department of geology and mineral industries. He will be assisted in the investigation by Dr. H. F. Yancey, supervising engineer, and M. R. Geer, field engineer, of the Seattle station of the U. S. bureau of mines, who already have started work in the field.

Outlining the program of study, Evans stated that he expected to determine the best source from which coal can be produced in the largest quantity at the lowest cost and in the shortest period of time. This is necessary, he said, to insure a supply of fuel for western

Oregon army camps, and to increase the supply of coal for the region generally.

(Ed Note: The Jackson County Chamber of Commerce has requested that Mr. Evans also be sent to investigate the coal situation in the Medford-Ashland district.)

## CAPT. M'ILLAN HEADS CAMP WHITE THEATERS
