MEMO TO ADVERTISERS

HOW TO MEASURE Advertising Values

WE ASK advertisers to think of the circulation of this newspaper in terms of the distribution of their advertising—the size, quality and interest of the audience to which their advertising is addressed. From that viewpoint our circulation becomes a more direct factor in business plans.

There are well-known standards for circulation values just as there are definite measures of weight and quality as used in the purchase and sale of merchandise.

The standards for evaluating circulation have been established by the Audit Bureau of Circulations, a national cooperative association of 2000 advertisers, advertising agencies and publishers in the United States and Canada. This newspaper is an A.B.C. member.

The Bureau has a large staff of experienced auditors and each year one of these men visits our office and makes an audit of our circulation records. Based on the information thus secured, the Bureau issues official A.B.C. Audit Reports.

These reports tell how much circulation we have, where and how it is distributed, how much people paid (important because paid circulation proves reader interest) and many other facts that make it possible to invest in newspaper advertising on the basis of known values.

For complete and verified information about the distribution of your advertising when it appears in this newspaper ask us for A.B.C. reports.
