HEALTH QUIZ

Do you have poor digestion? YES NO. Do you feel headachy after eating? Do you get sour or upset easily? Do you feel tired—listless? Now everyone knows that to get the good out of the food you eat—you must digest it properly. But what most people don't know is that Nature must produce about two pints of the digestive juices—liver bile—each day to help digest your food. If Nature fails—your food may remain undigested—be sour and heavy in your digestive tract. Thus, it is simple to see that one way to aid digestion is to increase the flow of liver bile. Now, Carter's Little Liver Pills start to increase this flow quickly for thousands—often in as little as thirty minutes. When bile flow increases, your digestion may improve. And, soon you're on the road to feeling better—which is what you're after. Don't depend on artificial aids to counteract indigestion—when Carter's aid digestion after Nature's own order, when taken as directed.
