ATTACK ON THE DOUBLE

Our fighting men answer the command with every fiber of their being—with every available means. On the double to them means redoubled speed in action, and redoubled effort as they thrust forward to vanquish the enemy, to liberate the oppressed, and to bring closer their return home.

BUY — DOUBLE

If we too would fight side by side with our front-line heroes in effecting final victory, let us consider their command our command and answer it by buying double the amount we've ever purchased before in WAR BONDS. The Fifth War Loan is our opportunity to join the fight on the double.
