

NO LIGHT THROWN ON EXPULSION OF FINNISH ENVOYS

Prospect's Social Affairs Talk Hinted as Reason—Knutson Irked

Washington, June 17—(U.P.)—The State department has no intention of revealing the "internal activities" of Finnish Minister Hjalmar J. Procope or of telling Procope or his government anything except that the minister and his three counselors were persona non grata, it was learned tonight.

There was no confirmation in official circles that their expulsion was the result of reports that the men whose homeland is at war with Soviet Russia and Great Britain had talked out of turn.

Unofficial sources, however, believed that the almost unprecedented action—the last similar case occurred in 1893—was because of Procope's conversations at social affairs which officials feared were promoting suspicion of the Soviet Union.

Despite the strained relations between Finland and the United States in the last three years, Procope has been a popular member of the diplomatic set and has continued his social activities without much change.

The United States, during these years, has used all of its powers of persuasion to get Finland out of the war. During the recent unsuccessful Russo-Finnish peace negotiations, it worked assiduously behind the scenes for an agreement.

Meanwhile, Rep. Harold Knutson, R., Minn., told the House that "thanks to President Roosevelt and Secretary of State Hull the Republic of Finland will shortly be a glorious memory."

Knutson said it was not long ago that the administration pointed to Finland as "the shining example of honor, honesty and rectitude," but that now millions of Americans "feel humiliated over the shabby treatment that this administration has accorded the Finnish people." He blamed the president and Hull for giving "the Russians a free hand to invade Finland and wage a war of extermination."

Knutson said he could not understand why this country would ask Finland to declare war on Germany and not insist that Russia declare war on Japan.

1945 - '46 Headlines

Dec., '45—8,000,000 Unemployed
Mar., '46—12,000,000 Unemployed

Insecurity, Destitution, Desolation, Strikes Millions of American Homes I did not compile these headlines. These figures are taken from a chart prepared by the Research Institute of America.

My Chart Reads:

NO—

To think there is any more necessity for unemployment during peacetimes than during war times is dangerous nonsense. We had 12 million unemployed in 1931, '32 and '33. Americans are being killed on the world's battlefields today because we neglected to put a sufficient number of these unemployed workers to work preparing for the defense of our country. A sufficient number of workers must always be kept at work in public works to induce capacity production of wealth. A nation's crime and weakness is its inability to keep all its workers fully employed. Our economy must be so constituted as to at all times furnish full time employment to all employable workers wanting jobs.

ECONOCRACY—PEACE-TIME JOBS

By J. C. BARNES.

Econocracy—the institution, in a state in which production of wealth is carried on under a system of free enterprise, of the governmental machinery necessary and the enactment of the legislation required to insure the establishment and stabilization of family unit purchasing power at a level high enough at all times to induce and balance capacity production of material means to satisfy human desires without sacrificing maintenance of capital equipment.
