

HEALTH BOARD OF FOUR SECTIONS IS EXPERT'S ADVICE

Reorganization of Oregon
State Setup Proposed
After Survey by Dr. Buck

Reorganization of the Oregon State Board of Health into four major sections is proposed in the survey of the Health Board's facilities, personnel and methods recently made by Dr. Carl E. Buck, field director of the American Public Health association. Establishment of these sections, designated as administration, preventive medical services, environmental sanitation and local health service, is one of the several basic changes in the health department's organizational set-up proposed by Dr. Buck and described in the last issue of the state health bulletin.

Dr. Buck spent two months in Oregon recently conducting his investigation. He came here at the invitation of Dr. Frederick D. Stricker, state health officer, to compile a report which would be of assistance to the interim committee set up by the 1943 legislative assembly to conduct an investigation of the State Board of Health. The report recently submitted to Dr. Stricker is preliminary in nature.

State Department

Under the reorganization proposed by the report, Oregon's public health agency would be known as the State Department of Public Health, with a Board of Health constituting the advisory, judiciary and policy-forming branch, and the state health officer and his staff constituting the executive branch. Existing divisions of the State Board of Health would be re-grouped, each falling within one of the four sections. Four new divisions are recommended: public health dentistry, health education, milk control and supervision, and meat and other food products. Dr. Buck also proposes re-establishment of the division of mental hygiene, which was suspended last year.
