**WARNS WOMEN OF
CIO'S PROGRAM TO
RAID SCHOOLROOM**

Louisville, Ky., Sept. 9.—(U.P.)—Miss Marion E. Martin, the GOP's No. 1 woman, today warned the meeting of the National Federation of Women's Republican clubs here that the Congress of Industrial Organizations' Political Action committee is engaged in a "long range program to subvert democracy."

"The PAC is employing Nazi tactics by urging that pupils in California grade schools be taught trade unionism," Miss Martin declared.

"Our schools are dedicated to training our children to think rather than to follow. Any attempts to indoctrinate our children with dogmas violates one of our most precious heritages."

Miss Martin, snapping-eyed assistant chairman of the Republican National committee, who laughingly describes herself as "halfway between the black-stockinged suffragette and the glamour puss politician," re-

mind her listeners that "the public schoolroom is one of the American institutions closest to the hearts of the nation's women."

She called upon her audience to point out in campaign arguments that "the same organization which is employing these un-American pressure methods," is supporting President Roosevelt.

MATTOON MADMAN IS IMAGINATION EXPERTS FIGURE

Mattoon, Ill., Sept. 9.—(U.P.)—Police today turned to science to determine if the "madman of Mattoon" is a real boogie man who paralyzes his victims with "gardenia gas," or merely the product of overworked imaginations as a result of reading too many comic books.

Police Chief C. E. Cole said he would submit a piece of cloth, reportedly impregnated with the hypnotic gas, to the state crime bureau at Springfield for a chemical analysis.

The cloth, the only tangible clue to the existence of the nocturnal prowler, was found Tuesday night on the porch of her home by Mrs. Carl Cordes, 45

Mrs. Cordes suffered facial burns and had to be hospitalized for treatment after sniffing the cloth, police reported.

Meanwhile, five Chicago chemical experts discounted the story as a hoax, saying that a rumor, plus a whiff of clover, ragweed, smoke or sour milk, plus 98 per cent imagination, have created a non-existent prowler.
