

An Urgent Appeal To All Citizens---

BEFORE they went into the battle of Tarawa the 10th regiment of Marines sent \$300 to the National War Fund. Ernie Pyle, famous war correspondent, tells how American soldiers in Italy and France share their rations with hungry, solemn-faced youngsters.

When the GI's share their own money and food with the victims of war-ravaged lands, can the home folks do less? The people of THIS community ought to think of that this week when they are asked to support the National War Fund and their own Community Chest.

Our men, our money and our sacrifice are in this war. We want to get it over with just as soon as we can. Giving to these sorely needed and practical philanthropies is but one way to impart in our fighting forces the will to win—and in our gallant Allies the strength and hope that will carry them through to victory.

Yes, we want to keep the USO clubs open for our men—homes for them away from home! We want to keep the Camp Shows heading for the front lines. We want to relieve the suffering and boredom of our men in Axis war prisons, and aid our valiant seamen in the ports of the world.

Food, shelter, medical supplies and clothing, too, for those who live in war-scorched lands. Money given to the National War Fund makes that possible, too.

We have our own state and local agencies so deserving of our support . . . the health and character of our Youth must be carefully guarded in wartime for the boys and girls of today are the hope of this Nation tomorrow.

A thousand services . . . a million kindnesses . . . are wrapped up in your single gift to the Medford Community Chest and the National War Fund. Your generosity will be felt 'round the world. It means a speedier victory—a better world when peace is won.

What will YOUR answer be to this urgent appeal?

Support Generously the
MEDFORD COMMUNITY CHEST
