SINUSITIS

It seems that sinus trouble is becoming more common. Most sinus troubles are catarrhal conditions. While smoking is usually considered the cause of sinusitis, it can and usually does, if excessive, serve to aggravate this condition. Smoking naturally irritates mucous membrane. This irritation causes an increased secretion from the mucous surface of the sinuses. The secretions become thicker, gradually accumulate in the sinuses, congestion occurs, drainage is interfered with, and pressure results. In treating sinusitis the general mistake is in considering sinus trouble as a local disturbance. This leads to the use of sprays and inhalations. Sinusitis develops from a systemic background. Nature cure methods, attacking it along this line, offer the best chance for its successful treatment.

Letter From Union Gives Appreciation To County Chamber

Jackson County Chamber of Commerce has received a letter of appreciation from the United Telephone Employees of Oregon for the use of rooms in the building for a meeting in November. "It is rather a rare occasion for a labor union to meet in a Chamber of Commerce edifice," Edw. T. Healy, president of the group, wrote, "as by some it is presumed we are not on the best of relations. We do not feel that way and the fine civic spirit you have shown in the above gesture should disapprove and condemn any such thought or idea."

Mr. Healy further commented on the fact that the union used the rooms without charge.

Autos and trucks can now run on fuel made from wood. You may drive into a gas station and say, "Saw me off five gallons, please."

Selby also gave a talk on the history of the Christmas seal sales.
