**HEALTH TALKS** By **DR. A. R. HEDGES** Chiropractic & Naturopathic Physician 128 E. Main Dial 3170

**BODY CHEMISTRY** In normal health the body chemistry is automatically controlled by the nervous system. Mechanical defects upset the delicate balance of body chemistry. Normal nerve function can be restored through mechanical correction and thus the internal chemistry of the body is normalized. Vibrant health is evident in a body which has a balanced chemistry. To overcome your ills resulting from abnormal body chemistry have your structural adjustment done by one trained in its mechanical correction.

## Wall Street

**New York, Jan. 22—(UP)—**Stocks declined today for the fourth consecutive session, but rallied from the lows and displayed a steadier undertone at closing time.

Early unsettlement was traced to the appointment of Henry A. Wallace to succeed Jesse Jones as secretary of commerce and head of several other government agencies. The subsequent recovery was attributed to belief the appointment will have tough sledding in the senate.

Other factors in the recent decline are listed as the Russian successes seen as hastening the reconversion period with its many problems, and the securities and exchange proposal to eliminate the floor trader on the major exchanges.
