

# ROSEBURG MAN IS NEW PRESIDENT OF P. C. ASSOCIATION

Eugene Fisher, Roseburg, was elected president of the Southern Oregon Production Credit association at a meeting of directors held here yesterday afternoon immediately following the 11th annual stockholders' meeting of the association. He succeeds V. D. Brophy, Medford, who resigned from the board several weeks ago after having served as president for the past several years.

Elmer Hull, Central Point, was elected vice-president to succeed Ben Hilton of Grants Pass, who also resigned recently after several years on the board. Other newly elected board members named here and by stockholders attending the first section of the meeting held in Roseburg Monday are: Jay Conn, Roseburg; J. P. Johnson, Coquille; and Raymond Lathrop, Grants Pass. Johnson succeeds himself.

Report of the nominating committee was given by E. P. Vilas of Medford.

**Henry Speaker**  
Main speaker at the meetings here and in Roseburg was Ernest E. Henry, president of the Production Credit corporation, Spokane. He reviewed the history of the Production Credit system and explained the financial set-up of the system from a national, regional and local angle.

Commenting on the local association, the speaker stated that members should plan not only for the present but for the future and should keep in mind the post-war periods when they might be more in need of credit than at present. He urged stockholders to keep their stock, even though not borrowing at present, and to invest earnings from crops in war bonds which would earn interest on a year-round basis.

The speaker pointed out that farmers have been accused of not buying their share of war bonds and he urged his listeners to buy as many as possible and to list them in their financial statements. In closing, Mr. Henry reminded the stockholders to "put your house in order while the going is good" and to remember that "you won't get dependable credit unless you are dependable yourself."

**Reports Given**  
Reports for the local association were given by E. W. Jarboe, Spokane, credit examiner of the corporation. Stockholders number 210, the report showed, with 167 holding "B", or voting stock. Amount of stock now owned by members totals \$33,400, the report stated. Fifty-seven members used the credit facilities of the association during the past year. A total of 1,700 loans have been made since the association was founded, the dollar volume being \$4,364,000.

At the close of the meeting a rising vote of thanks was extended Brophy, Hilton and Bren H. Starcher, former secretary and manager of the association, at the suggestion of Ralph Cook. Mr. Starcher, with the association for the past eight years, has also resigned.

About 50 persons attended the meeting, held at the Holland Hotel with Fisher presiding.

# JACKSON COUNTY FARM NOTES

Compiled by County Office O. S. C. Extension Service

**AAA Closing Date is February 15**  
Closing date for the 1944 AAA program is February 15. All farmers signed up under this program who have not checked their 1944 compliance should do so at once. The rulings for this program are not made in the local office and every year a number of farmers appear too late to make out the final papers for the preceding year.

**Grass Seed Loans Extended to February 15**  
The closing date for the hay and pasture seed loan program has been extended one month to February 15. The extension was obtained to give growers who have not yet marketed sudan grass seed time in which to have the seed cleaned and tested and placed in approved warehouse in order to qualify for a loan of 6 cents a pound.

**Long Range Plans Stressed in AAA Program**  
A 1945 agricultural conservation program designed to help Oregon farmers and ranchers continue record wartime food production and at the same time undertake more long-range conservation practices was announced to farmer committees from all Oregon counties at the recent state AAA conference in Corvallis.

The program will offer a wide range of proved practices well adapted to Oregon agriculture to encourage better farming methods that conserve soil and water resources. Payment rates will reflect approximately 80 per cent of the cost of carrying out the practice.

Practices that contribute directly to improved soil productivity, such as application of lime and phosphate, are continued. Use of these materials has increased substantially in the past seven years under the AAA program.

The committeemen stressed the importance of checking the soil erosion and depletion that has taken place during war years, as Oregon farmers increased total production nearly one-third above pre-war levels. Emphasis was placed on taking steps now to restore productivity taken out of the soil by the increase in production to meet war needs.

As in 1944, no farm allowance limitations will be imposed by the 1945 program, so that each farmer may perform and earn payments for as large a conservation job as his farm needs. The total exceptions are the \$2 an acre allowance for lime and phosphate, and total payment limitations placed on a few individual practices.

**Henry Owens Heads County 4-H Leaders**  
Henry Owens, leader of the Valley view livestock club, was elected president of the Jackson county 4-H club leaders' association Wednesday evening. Other officers elected were George Nichols, leader of the Bellview Sheep club, vice president; and Merton Bradshaw, leader of the Lake Creek Beef club, secretary.

Special awards earned by club members at the various fairs and contests were made at this meeting. These awards were:

1. A gold medal and a gold watch to Merton Bradshaw as county and state winner in the National meat animal contest sponsored by Wilson and Company.
2. A silver medal to Don Nichols for placing second in the livestock judging contest at the Pacific International Livestock Exposition.
3. A gold medal to Dorothy Stanley as winner in the National clothing contest sponsored by the Spool Cotton Company.
4. A gold medal each to Joann Doran and Lucille Smith as county winners in the National Dairy Foods demonstration contest, sponsored by Kraft Cheese Company.
5. A summer school scholarship ribbon to Marian Wisdom for the champion wool suit in the state show, and the same prizes to Pearl Henry for champion formal dress at the state show.
6. A \$25 war bond for champion beef showman and a \$25 war bond and a gold medal as state and county awards in the National food for victory contest to Allene Owens.
7. A \$25 war bond provided by C. G. Elmhurst to Bill Williams for raising the highest dressing steer last year.
8. A \$25 war bond provided by Dr. G. A. Gitzen, to Wayne Russell for high scoring individual in the county livestock.
9. A \$25 war bond provided

**Advice Given On Pruning Shrubs**  
Pruning flowering shrubs at the wrong season is one of the common causes for unsatisfactory blossoming. Generally speaking, there are two distinct types of flowering shrubs. One type produces blossoms early in the spring from over-wintering buds. If these buds are removed with them, it is impossible for the plant to produce buds quickly enough again for blossoming before the following spring.

This large group is represented by lilacs, spirea and flowering crabs. These and others in this group should not be dormant pruned. They should be allowed to flower and as soon as the petals fall they should be pruned. The severity of pruning depends on the individual shrub, but enough wood should be removed to allow the plant to make a vigorous growth.

For the bush shrubs like spirea, the oldest canes should be cut out at the ground. The weakest of the new canes should also be removed. Very little cutting back is practical.

For lilacs, all the flower stalks are removed as well as the weak twigs. That would produce poor blossoms or none at all. If the lilac is growing vigorously, little pruning need be done, but as growth slows up, more wood should be removed.

Summer flowering shrubs like the rose and tamarisk should be pruned while dormant. The severity of the pruning will depend on quality of blossom desired. The heavier a rose is pruned, the fewer will be the blossoms produced, but

the better their quality. Whenever possible, old canes should be removed entirely and replaced by young canes.

—C. B. CORDY,  
Assistant County Agent.

by Sampson Feed and Seed, to Ronald Lehman for outstanding work with sheep in Jackson county.

**OBITUARY**  
**GLEN S. McCAY**  
Glen S. McCay, resident of Medford the greater part of his life, but for the last four years a resident of Klamath Falls, passed away in a hospital there about midnight Wednesday at the age of 34.

The remains will be brought to Medford for services and interment. Time of services with a complete obituary will be announced by Conger-Morris Funeral Parlors later.

**JOHN D. WILLIAMS**  
John D. Williams, a resident of Jackson county for many years, passed away last evening at Gold Hill, following a brief illness.

A complete obituary will be published later.  
Perl Funeral Home is in charge of funeral arrangements.

**SOPHENIA ISH BAKER**  
Sophenia Ish Baker, a resident of Oregon all of her life, and Medford for the past 70 years, passed away at her home on route No. 2 Wednesday morning, Mrs. Baker was born in Umatilla county on May 11, 1864.

She leaves a host of friends to mourn her passing.  
She is survived by three sons, Harry Baker, Prospect, Ore.; Chester and Matthew Baker, of Medford; also three grandchildren. One son, George Baker, passed away in Tacoma, Wash., in 1939.

Funeral arrangements are in charge of Perl Funeral Home and will be announced later.

**BETTIE J. REGNIER**  
Bettie Johnson Regnier, a resident of Jackson county for a number of years, passed away in San Francisco, January 21. Mrs. Regnier was born March 20, 1891, at Wilford, Idaho. On September 6, 1910, she was married to Edward Regnier at Boise, Idaho. Mr. and Mrs. Regnier have operated the Union Creek resort for the last 18 years.

Mrs. Regnier leaves to mourn her passing, her husband and one daughter, Mrs. Evelyn Elmore, of Union Creek; two brothers, J. W. Johnson, Kellogg,

Idaho, and S. E. Johnson, Spokane, Wash.; four sisters, Mrs. O. M. Johnson, of Denver, Colo.; Mrs. Tom Durbin, Dunsmuir, Calif.; Mrs. Alice Baker, Roseburg, Ore., and Mrs. Emma L. Jenkins, Los Angeles. She also leaves a host of friends in Jackson county.

Funeral services will be held Friday at 2 p. m. at the Perl Funeral home. The Rev. Harry Hansen of the Presbyterian church will officiate and inter-

Thursday, Jan. 25, 1945 MEDFORD MAIL TRIBUNE—FIVE

ment will be in Siskiyou Memorial Park.

**JAMES J. FERRELL**  
Funeral services for James J. Ferrell, resident of Medford for 12 years, but late of Klamath county, who passed away in a local hospital late Tuesday, will be held in the Conger-Morris chapel at 2:30 Friday with the Rev. Wolford A. Dawes officiat-

ing. Interment will be in the Medford I.O.O.F. cemetery.

**Do FALSE TEETH**  
**Rock, Slide or Slip?**  
FASTEETH, an improved powder to be sprinkled on upper or lower plates, holds false teeth more firmly in place. Do not slide, slip or rock. No gummy, sticky, pasty taste or feeling. FASTEETH is alkaline (non-acid). Does not sour. Checks "plate odor" (denture breath). Get FASTEETH at any drug store.

## Copper Starts to War via Great Northern

A vast amount of the copper so vital to the production of war-winning weapons for America and her allies starts for the world's battle fronts in Great Northern freight cars.

From Montana's famed, fabulous copper industry—and from mines and smelters in near-by states, too—tremendous tonnages of the red metal in many forms are moved to distant arsenals, foundries and plants by Great Northern's supply line.

The Northwest's copper industry relies on Great Northern for dependable transportation. And, the railway depends on copper from its territory to keep its equipment in shape and the supply line rolling.

FIGHT INFANTILE PARALYSIS with Your Dimes

## To help maintain your highest vitality HELP GUARD BLOOD'S "IRON LEVEL" WITH THIS DELICIOUS CEREAL

One-ounce dish of KELLOGG'S All-Bran gives over 1/3rd your daily minimum iron needs

YOUR blood wears out just like most other parts of your body. It must be replenished daily—to keep vitality up to par. To make this new blood, iron is one of the essential things.

The best way to get iron is in foods. But few foods provide significant amounts of iron. Thus, your diet can be poor in iron without your knowing it—and your "iron level" may decline. Fortunately, however, there is one well-known breakfast cereal that is extra rich in iron. And that is KELLOGG'S ALL-BRAN, which provides even more available iron than spinach.

In addition to being rich in this vital element, KELLOGG'S ALL-BRAN is an important, natural source of calcium, phosphorus, vitamins B<sub>1</sub>, B<sub>2</sub> and niacin. This nut-brown crunchy breakfast cereal is made from the vital outer layers of finest wheat... chock-full of nutritive elements.

**KELLOGG'S All-Bran is made from the VITAL OUTER LAYERS of finest wheat**

You know that the skin of a potato and the peel of an apple are richest in vitamins and minerals. Into the vital outer layers of the wheat, as well, Nature has packed some of the richest gifts of sun and soil. ALL-BRAN is made of these vital outer layers and is more abundant in many needed food elements than even whole wheat itself.

**America's Great Regulating Food**

Besides being a storehouse of important food elements, delicious KELLOGG'S ALL-BRAN is Nature's great regulating cereal. Millions eat it regularly. A one-ounce serving is usually adequate for satisfactory laxation. ALL-BRAN, triple-milled for golden softness, does not interfere with normal digestion.

Make sure your family gets a good start on its daily quota of iron and other vital elements so plentiful in ALL-BRAN! Serve KELLOGG'S ALL-BRAN regularly at the breakfast table, beginning today!

DONOR OF 16 PINTS OF BLOOD

**IF HEALTHY, WHY DON'T YOU DONATE BLOOD?**

Mr. John P. Issel of 4428 N. LaPorte, Chicago, Ill. has given 16 pints—has been donating regularly since Pearl Harbor. Such patriotic men and women, everywhere, can tell you that anyone in good health can give blood. For the fluid part of the blood is restored in a few hours; the red corpuscles are soon rebuilt if the "iron level" of the body is properly maintained.

Made from the VITAL OUTER LAYERS of finest wheat

## HERE'S WHAT YOU SHOULD KNOW ABOUT

# THE MARCH of DIMES CAMPAIGN

The March of Dimes is a campaign to raise funds to combat infantile paralysis, one of the most expensive diseases to treat. Unless a family is wealthy, the financial burden of caring for victims is almost impossible. That is why it is important to know that the March of Dimes funds are available to *anyone* needing help in recovering from polio. Many stricken families of moderate means feel that they cannot ask for help. *But they can!* Arrangements may be made for the care of patients depending on their condition, their family situation and general needs.

**FIVE CENTS** of every dime contributed stays with your local chapter for disbursement among local agencies and individuals. Not only are grants made to institutions for the care of infantile paralysis patients, but funds are also used for individual care.

**FIVE CENTS** of every dime contributed goes to the National Foundation for three specific purposes... research into the causes and methods of prevention of polio... epidemic aid, supplying equipment and supplies to communities where epidemics occur; and additional financial aid for local chapters.

## HERE'S WHAT YOU SHOULD DO ABOUT THE MARCH of DIMES CAMPAIGN

Fill out coupon at right and mail it now with your generous contribution

Wm. Grenbemer, Chairman  
1945 March of Dimes Campaign,  
Courthouse Building, Medford, Oregon.

Realizing that "save for the grace of God" there goes my little boy or girl, I am happy to enclose my check. I've made it larger because I realize there's a bigger job to do. I wouldn't feel right unless I helped to my limit, especially since I know half of what I'm giving is being used here in my community.
