Even though it is only the middle of February, spring seems to be in the air this week. A few days of heavy rain early in the week brought the season's rain fall up to normal after rather a dry winter and today and yesterday the sun has been brightly shining. Enrollment figures for second semester show grade school enrollment up 16 per cent over last year, junior high school up 17 per cent and senior high school down four per cent. The last figure is due to the heavy enlistments in the navy or other branches of the service.

Funeral services were held this week for B. F. Van Dyke, native son of the county, who died last Saturday. He was 75 years old.

Highlights of the week for Republicans was the annual Lincoln club banquet Tuesday night, the 31st annual dinner meeting of the club, Judge J. B. Coleman, III for several weeks, missed the banquet for the second time since they were started. Dr. R. R. Sherwood has left Medford to practice in Victor-

Troop 5 met at St. Mark's Parish Hall Wednesday evening. Highlights of the evening was an interesting and educational talk on the intricacies and general use of a pocket compass. The speaker was F. G. Whitney, assistant supervisor of the U. S. Forest Service here. He told of the use made of the compass by foresters and loggers and warned that while a compass needle always pointed to magnetic north, the instrument was not complete in itself but needed certain knowledge on the part of the user.

Mr. Whitney has promised to return to the troop at a future date and give information on map reading. After the talk plans were made for all troop members who could to participate in the overnight hike sponsored by Dr. Goodrich.

MILK SUBSIDIES REVISED TO HIKE BUTTER OUTPUT

Washington, Feb. 16.—(AP)—War Food Administrator Marvin Jones today announced rate revisions in the government's milk and butterfat subsidy program designed to check the current decline in butter production.

The present subsidy schedule was designed to encourage production of milk by-products such as evaporated milk and milk powder. By increasing butterfat payments from last year's level

and by reducing milk payments during the summer months, WFA hopes to encourage output of more milk during the fall and winter months. WFA also hopes butter production will be stabilized and possibly increased slightly.

18 Cents Ceiling

Under the new program the butterfat subsidy will be kept at 10 cents a pound through September and then will rise to 18 cents a pound for the final three months of the year. The rate normally is reduced during the summer months.

The present basic milk subsidy rate, which ranges from 60 to 95 cents a hundred pounds according to locality, will be cut 35 cents a hundred pounds during April, May and June. During July, August and September the cut will be reduced to 25 cents. During the last three

months of the year the subsidy will return to 10 cents.

Almost 2,000,000 dairy farmers benefited by the subsidy during 1944 when the program cost \$345,000,000. Jones reported that under the scheduled 1945 program farmers should get about the same returns for marketings of whole milk and somewhat more for butter fat.
