

13 BUDGET BILLS AWAIT INKING BY GOVERNOR SNELL

Salem, Ore., March 14 — (U.P.)—Without dissent, the Oregon Senate today completed action and sent to the governor the first 13 of a group of budget bills appropriating nearly \$12,000,000 for state expenses during the next two years.

Only discussion came on the penal institutions and hospitals bill, with some members advocating setting up a building fund apart from the budget. The move was voted down on assurance the budget contained earmarkings for new construction. It was pointed out also that salary raises averaging from 12 to 18 per cent were provided for low bracket state employes.

House Passes Two
The House, too, acted on appropriation bills, passing two aggregating \$583,000. Senate Bill 435 appropriates \$68,000 for the Oregon State Employment Service, the money contingent upon the reactivation of that unit. Senate Bill 436 appropriates \$515,000 for homeless children, orphans, foundlings and wayward girls.

The House also passed a bill which gives the duties of licensing and inspecting restaurants to the State Board of Health. It was taken away from the Department of Agriculture in another bill passed recently.

MANY MEXICANS EAGER TO ENTER U. S. EMPLOYMENT

Washington, March 14—(U.P.)—More than 100 Mexicans who sought to enter the United States illegally were taken into temporary custody each day of December, 1944, by border patrolmen from the department of justice, Ugo Carusi, immigration and naturalization director, told the house appropriations committee.

The December total was 4,360, Carusi said in testimony released today.

Rep. Robert F. Jones (D., Ohio) asked Carusi if it did not seem inconsistent to return the Mexicans when congress appropriated money to bring Mexicans to this country to help with harvests. Carusi agreed, but said Mexico demanded the illegal entrants be returned if she were to fulfill her contract to supply agricultural workers.

The "Talking Fence"

You're rolling along through mountainous western country. Suddenly your train stops. Ahead—a signal light has turned red. The "talking fence" has flashed its warning to the engineer.

Technically known as the "slide detector fence", it is erected parallel to Union Pacific tracks as a protection against falling rocks, trees or other possible obstructions. Any such object striking the fence breaks an electrical contact, "setting up" signals miles down the track to warn trains approaching in either direction. A trainman must then make a thorough inspection before trains can proceed.

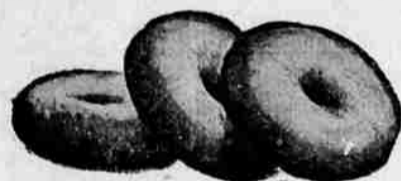

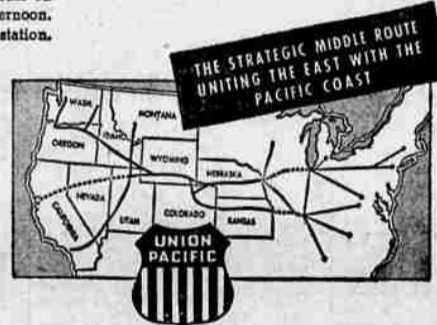

Union Pacific uses every possible precaution to safeguard its passengers and freight... troops and war materials... transported over its Strategic Middle Route uniting the East with the Pacific Coast.

★ ★ ★

The "talking fence" is but one of the many safety devices developed by our nation's railroads. Such improvements result from enterprise and initiative; characteristic American traits that built the Union Pacific... that built *Your America*, land of equal opportunity for all.
