**Delaying Senility**  
Delaying the approach of senility does not merely mean the prolonging of life in a body that is enfeebled and decrepit. It means the prolonging of an efficient life in an efficiently functioning organism. Natural death seldom occurs. The body is not given a chance to naturally wear out. This results from our mistaken concepts of life and from errors in proper body-care and maintenance. We must not enslave ourselves by the undue strain and stress of life. Do not live in the past nor fear the future. Do not worry. Live in a stimulative calmness of the future and its possibilities. Make yourself useful to life and life will be useful to you.

## THE OLD JUDGE SAYS...

"That's news to me, Judge. From the way some people talk you would think it was at least 50%."

"No, Clem, there's the statement right here in the paper... from authorities who have made an exhaustive study of the subject. Only about 5% of the people who drink occasionally abuse the privilege... 95% drink sensibly."

"No wonder you say it wouldn't be fair to take the privilege away from the other 95%, Judge. I agree with you."

"I can't see it any other way, Clem. No more than I could see taking automobiles away from everybody because a few drive recklessly and have accidents. Or preventing the making or sale of cake or doughnuts because some folks eat too much and get indigestion."

"In the case of spirit beverages, the answer is one of education and better control."

"As a matter of fact, the responsible members of that industry are working constantly toward that end. They don't want folks to abuse the use of their product any more than we do."
