How DAIRY FARMERS AND THEIR COWS CONTRIBUTE TO THE WELFARE OF THE COMMUNITY

The rich lands surrounding our community are kept rich through the processes of dairy farming... by the scientific use of dairy cows in reviving the land and insuring its richness for the future.

When the dairy farmer brings his milk and cream to us, things happen for the benefit of all.

The dairy farmer gets a fair return for the product of his labors—and dairy farming thrives. The dairy farmer has money to spend—and the community thrives.

Our work in this is to provide the bridge... the bridge that connects the dairy farmers with the business of the community.

Again We Say — 12,000 CRIPPLED CHILDREN AWAIT YOUR ANSWER!

Yes, 12,000—hundreds of whom live in Oregon, are waiting for free treatment in Shrine Hospitals but present accommodations already overtaxed prevent admitting any more until larger facilities are provided.

Deformed children must be treated while young else cure is almost impossible. Delay means that these hundreds of Oregon children, whose parents are too poor to pay for treatment elsewhere, will be deprived of free treatment at the Shrine Hospital—will miss their one and only chance for a useful and happy life.

That these helpless children may live more helpfully and more happily—yes, and face life more hopefully the Jackson County Shrine Club will this week ask you to help provide the facilities for rehabilitation of these physically handicapped, destitute children.

What an enriching experience to participate, with thousands of others, in this outpouring of our hearts and our purses that these little ones, regardless of race, creed or color, may have an equal chance in life.
