

GRADE SCHOOLS TO PARTICIPATE IN HEALTH DAY

May 1st, the principal spring festival day, and National Child Health Day has been chosen as the day when the Medford elementary schools will have their annual health-day activities.

Each school will have an appropriate program or field day activities as a climax to the health program of the school year and a treat will be given to all pupils, following which school will be dismissed for the day.

As far as possible all pupils in the Medford school system are examined by a physician early in the school year and parents are notified of physical defects found.

Something new in teamwork

Necessity barked: "You do as I say!" So that's the way we did it. Nobody talks back to Necessity—not in wartime, anyhow. "Yes, sir-r-r!" we replied obediently.

Forthwith, we employed women to work with men at our service stations. It was an innovation... an experiment... a departure from long tradition. Frankly, we had our fingers crossed—and hoped for the best.

Now, letters from the public tell us the experiment has clicked. They say our men and women, working together, are maintaining remarkable service. If it's not peacetime perfection—as what is?—it's a reasonable facsimile.

"For seven years," runs one such letter. "I have always gone to one favorite Standard Station. With the war, my young friends there went away. Now a man and a woman carry on in their stead. Like the others, they too, are cheerful and courteous. I like them because they are interested in helping me care for my car."

"But this man and woman have developed something I find noteworthy. They split up the work so the woman does what a woman can do best and the man does what a man can do best. This is teamwork—and they make a fine team!"

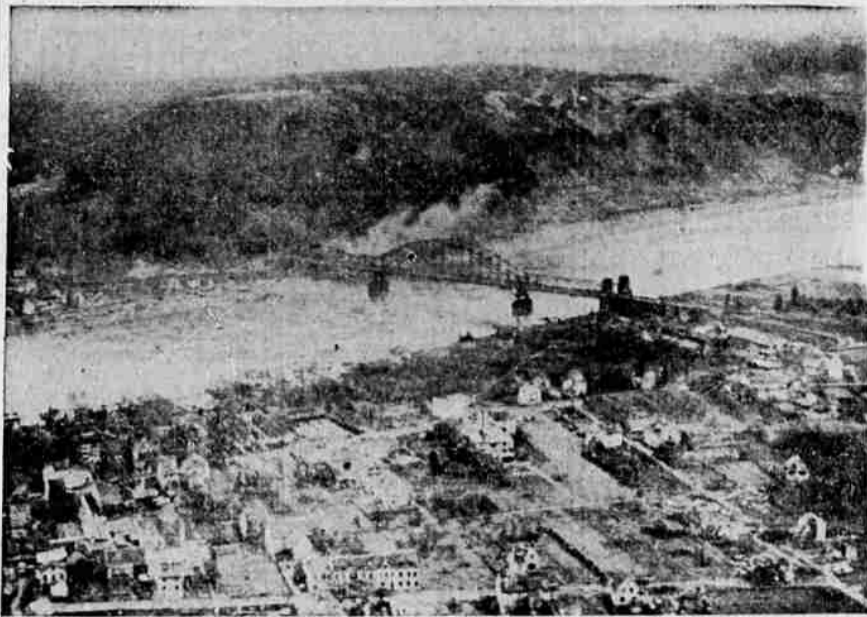

Many station crews have thus worked out voluntarily the best way to handle their particular set of problems—not as individuals, but as teams. They give an extra something to all our systems... training... planning.

Of course, nobody ever says "Thank you" to Necessity—a slave-driver if ever there was one. But when it leads to something so nice as this—well, Necessity has its points.

facts found. If defects are thought to interfere with the pupil's general health or his school progress, parents are urged to have them corrected.

Pupils who have no serious remedial defects or have had defects corrected are eligible for the Health Honor Roll. The school having the largest percentage on the Health Honor Roll is given an award.

An award is also given to the school having the largest percentage doing their morning health duties.

Morning health inspection is based on the idea that everyone should look his best and feel his best for the day's work. An attitude of personal responsibility is encouraged in the pupils with the hope that the habits practiced daily during these years may be firmly established by the time elementary schooling is completed.
