

# JACKSON COUNTY FARM NOTES

Compiled by County Office O. S. C. Extension Service

## The New Farm Slaughter Regulation

Beginning May 15, new regulations will be in effect covering the slaughter of farm live stock for sale. All farm slaughterers must register with the OPA and receive a quota in pounds of dressed meat for each of the four quarters of the calendar year. This quota will be equal to the percentage the farmers sold in 1944, providing he turned in the number of ration points and coupons required under the rationing regulation. All previously issued permits by the War Food Administration are cancelled.

Farmers who sold no meat in 1944 can register with their local OPA board and obtain a quota of deliveries up to 400 pounds per year.

## Announcement of Dairy Payment Rates

The War Food administration has announced that dairy production payments will be made through March 31, 1946. Payments will continue to be made on a quarterly basis. The rates of payment as announced are: 2nd quarter 1945, April, whole milk 70c a hundredweight, butterfat 17c per pound; May and June, whole milk 35c, butterfat 10c; 3rd quarter 1945, July-August, September, whole milk 45c, butterfat 13c; 4th quarter, October, November, December, 70c whole milk, butterfat 17c; 1946,

1st quarter, whole milk 70c, butterfat 17c.  
Payments for April, May and June will be made after July 1st.  
R. G. Fowler,  
County Agent.

## Grow What You Like To Eat

Seeds of the warm weather crops should be planted this weekend. These include cantaloupe, cucumber, bush beans, summer squash, winter squash. In planting these a shovelful of rotted manure placed under each hill will assist in producing luxuriant growth.

Banana and Hubbard squash are susceptible to wilt which is spread by squash bugs. This generally kills an entire hill. To hold this in check, plant these squash in rows instead of hills. Plant the seeds 8 to 12 inches apart.

Potato tops should now be sprayed or dusted with cryolite or lead arsenate for control of leaf eating pests. For spray use 1 tablespoonful in 6 gallons of water.

Peas should be dusted with rotenone when the first blossoms appear and again 10 days later for control of pea weevil. This dust will also control aphids if applied when aphids first appear.

Blackberries (not Youngberries) can still be sprayed for control of red-berry. Use 1 quart liquid or 1 pound dry lime sulfur in 3 gallons of water. Early flowering shrubs such as flowering quince should be pruned now. Lilacs should be pruned as soon as through flowering.

C. B. Cordy,  
Assistant County Agent

## Asparagus Preserving Methods Reviewed

With local asparagus at its peak homemakers will do well to review the best procedure in preservation methods. Freezing is the simplest and most satisfactory method of preserving asparagus. Of prime importance in freezing any food is that it be put into the locker within a few hours after harvesting, if possible. Asparagus should be sorted, washed carefully and trimmed to desired length. Blanching of vegetables in boiling water is a necessity to destroy enzymes that will cause an off flavor if the food is stored for any length of time.

Place small amounts of asparagus in a large quantity of rapidly boiling water and boil for two or three minutes. If steam blanching is used, blanch four to five minutes. Cool quickly in cold water and drain.

The preferred method of packing asparagus is a dry pack, however, a two percent brine

solution may be used. A satisfactory method of storing asparagus tips is to cut them in equal lengths and wrap in two thicknesses of locker paper as is done with meat. Short ends may be placed in locker cartons, packed either dry or in brine.

Asparagus is one vegetable that is definitely improved by quick freezing. In instances where there are no quick freezing facilities at the locker plant, it is advisable to spread the packages out throughout the locker so that they will freeze as quickly as possible.

In canning asparagus great care must be taken in washing and preparing it, since the scales will conceal small particles of dirt in which botulism bacteria may be present. It is advisable to pack all vegetables except tomatoes by the hot pack method and then process in the pressure cooker. Asparagus should be processed at ten pounds for 35 minutes for pint jars and forty minutes for quarts.

Complete directions and time tables on canning asparagus are available in the new edition of extension bulletin on home food preservation. This bulletin No. 642 is available through the office of the home demonstration agent free of charge.

Since methods of freezing foods have been changed greatly in the last few years, it is recommended that you have an up to date bulletin on the subject. Extension bulletin No. 623 on Food Preservation by Freezing is available through this office.

Marian J. Farrell  
Home Demonstration Agent

## DIDN'T GET ALONG

Hollywood, May 3.—(U.P.)—Film starlet Claire James, one-time winner of beauty contests and two-time loser at love, said today she would divorce Lt. Ray Dorsey. "We just didn't get along," she said.

# German People Reluctant To Look At Victims Of Murders

By Robert Richards

United Press Staff Correspondent

Nuenberg, Germany, May 3.—(U.P.)—It was hard to tell what the German people of this small town felt as they marched past the bodies of 161 prisoners slain by SS troopers.

"Why show this to me?" seemed to be their attitude. "I didn't do it. I didn't know about it." That was what the looks of most of them appeared to say.

Others, especially the very old, appeared only bewildered and not quite certain why they had come.

Jews Bury Own Dead  
But the Jews, who escaped the SS murderers, said what they felt.

"Do not touch our dead. We will pick them up ourselves," said Chuna Grunbaum, one of their number who made the long march here from the Flossenberg Concentration Camp.

During the march those who were too weak to carry on, or who halted seeking food and water were shot through the head or knocked down with a club. Every one of the bodies bore evidence of either a bullet hole or smashed skull.

Today the German men of Nuenberg carried coffins to the woods. But when the time came to put the bodies in the Jew crib "No Germans will touch our dead."

So tenderly and quietly they lifted each body into its wooden box.

Germans Blamed  
While the Germans filed past the bodies, a German-speaking American sergeant told them over a public address system:

"We blame you German people for these misdeeds. You are responsible."

First Lt. Edward Katz, Cleveland, O., kept the German file moving past the emaciated bodies shouting:

"Look at them. Go ahead and look."

The Germans stared and hurried past.

## Camp White Dance Schedule

Thursday  
Regular informal dance at Service Club No. 2. SCU orchestra.

## At the MarKade

A spring formal dance will be held at the MarKade Saturday, May 5. Music will be furnished by Carl and his high school musicians.

## MOURN HITLER

Lisbon, May 3.—(U.P.)—An official two-day period of mourning for Adolf Hitler began in Portugal today. The government decreed the mourning period yesterday and ordered all flags on official buildings to be lowered to half mast.

Findlay, O., May 3.—(U.P.)—John Hart, 102, Hancock county's last civil war veteran who was pronounced such a poor risk when he was 50 that he was refused life insurance, died yesterday. He was 102.

## Bernadotte Met Himmler April 24 Says Eisenhower

Paris May 3.—(U.P.)—Gen. Dwight D. Eisenhower today authorized the disclosure that Count Folke Bernadotte met Heinrich Himmler and a General Schillenburg at Luebeck at 1 a. m. on April 24.

Himmler and the general said Adolf Hitler had had a brain hemorrhage and might not live 48 hours.

Himmler admitted Germany was finished, according to a statement authorized by Eisenhower.

## Total Eclipse of Sun To Be July 9

Fort Worth, Tex., (U.P.)—Fort Worth amateur astronomers have thumbed out of their almanacs the information that a total eclipse of the sun will be visible in parts of the United States on July 9 for the first time since 1932.

The almanacs say the country will have to wait until 1954 for another one like it. The 1945 total eclipse will be visible over much of the world.

The narrow path of the total eclipse will start about sunrise in Idaho and move eastward across Montana, Canada, Hudson's Bay, the North Atlantic, Scandinavia, Russia, and end in Turkestan about sunset.

In Texas and other southern portions of the United States, the moon will only partially blot out the sun.

## WEATHER

Northern California—Mostly clear but with scattered thunder showers in the mountains today, tonight and Friday. Little temperature change.

## High School Bans Fraternity Hazing

Cleveland—(U.P.)—Members of a fraternity at Cleveland Heights high school were a little too strong with the "hazing" tactics on David DeRussy, a 17-year-old sophomore.

After the initiation young DeRussy had to eat his meals from the mantel and could only sleep on his stomach. As a consequence, school authorities barred the fraternity from participating in extra-curricular activities for the remainder of the semester.

Closing time for Sunday Too Late to Classify 8:30 Saturday afternoon—Please remember.
