New Analgesic Tablet
(Pain Relief)
now released to public
Thousands find it gives quicker, safe relief from headache—from pains of sinus, neuritis, neuralgia and arthritis

FOR MANY YEARS aspirin has been accepted by both the medical profession and the public as a safe, sure way to relieve pain.

But many people who had complete confidence in aspirin did not find it gave as *quick* relief from blinding, maddening pain as they hoped for. Hence in desperation they sometimes turned to other remedies less well proved.

To meet this situation a group of medical research men set out to see what could be done to speed up the analgesic or "pain-killing" action of aspirin—to make it bring their patients quicker relief, without heart or stomach upset.

Out of these researches came a really new kind of analgesic tablet, a combination of aspirin and calcium [illegible]. In this new tablet, aspirin do[illegible] safe job of relieving pain. B[illegible]ugh its combination with calcium [illegible]mate, extensive tests by physicians showed it gave most people both *quicker relief* and *greater relief* from pain.

After this extensive testing and use by members of the medical profession as a prescription remedy, this new analgesic tablet has now been released for non-prescription sale by every druggist. It is called Superin (from super-aspirin). You can get its blessed, quick relief from pain by asking your druggist for a bottle today—30 tablets for 39¢. Ask for Superin—*Super-in.* Prepared by Carter Products, Inc., New York.
