Diogenes didn't need a lantern

Diogenes, they say, was a very smart fellow. But when he took his lantern and went around looking for an honest man, he pulled an historic boner. Too bad that he didn't see his oculist twice a year. Diogenes needed glasses.

Had his vision been clear and true, he would have stepped up to the first person he met on the main street of ancient Athens—or any other place, for that matter—and ended his search. For almost everyone you come across is honest. Our experience proves that.

Only the other day a man, who had owed us \$927 so long we had written it off the books, sent in the money—and a letter of explanation. He had been short, he said, quite a while. In fact, this was the first time he had had the money. So enclosed find check!

In many variations, our experience has convinced us honesty is more than the best policy—it is the almost universal policy. Most people feel Sancho Panza hit the nail on the head when he said, "Honesty is the best policy." The best known of copybook proverbs is a generally adopted rule of life. On the other hand, there's another old saw that's equally true. It says that to be good, to be honest, is no way to get your name in the papers. That doesn't seem right. Hence these few words on the subject.

You read about the bad. But nobody mentions all the good people. You never hear, for instance, about such citizens as an unusual customer of ours who always pays us with a signed blank check. We don't encourage this practice, but feel complimented just the same. Our patron and Sancho are a lot nearer the beam than Diogenes.

HEALTH MEETING TOLD OF COMING OF MOBILE EX-RAY

The mobile X-ray unit which will offer a free chest X-ray to every Jackson county citizen in a campaign to accomplish an early diagnosis of tuberculosis, will come to this region in the fall. This is the news brought to Medford by Mrs. Saide Orr Dunbar, executive secretary of the Oregon Tuberculosis association. Mrs. Dunbar was speaker Friday afternoon at the annual meeting of the Jackson County Public Health association, which sponsors the Christmas Seal Sale to finance this campaign.

The discovery of 4,500,000 4F's by the army in the United States, Mrs. Dunbar described as a sad indictment of home, school and community. It is proof, she declared, that the home, the school and the community failed in their responsibility 20 years ago. For many boys, who are 4F's today she explained, would be in good health if the corrections, needed 20 years ago, had been made.

X-Ray Needed Early

The army examinations, she added, brought to light again the need for more thorough examination to locate tuberculosis in its early stages. The military X-ray brought to public attention the possibility of the whole-sale chest X-ray. The development of a miniature film made it financially feasible to examine millions. Then came the mobile unit, which made it possible to X-ray great numbers of persons in their own communities.

In Oregon 22,000 examinations have been made, Mrs. Dunbar stated, and the findings have already proved the worth of the pledges, picked on the basis of activities, were announced at a student body assembly May 17.

of the X-ray. There were 392 findings reported, of which 244 were cases of plmonary tuberculosis. Of these 146 had no idea of their condition and were therefore probable carriers of the disease to many others, 68 of them were very far advanced cases.

Definite progress has been made in all phases of public health, Mrs. Dunbar rejoiced, but Oregon still has a long way to go. Tuberculosis, the first cause of death when the fight began, is now in seventh place in cause of deaths. It is moving into the masculine ranks, however, and is attacking men in the most useful years of their life. Each case, Mrs. Dunbar reported, costs the state of Oregon \$10,000. She praised Jackson county upon its record Christmas Seal sale and the splendid work this region has always done in the campaign to eradicate tuberculosis.
