

PASSENGER CAR QUOTAS SET FOR NEXT 9 MONTHS

Washington, June 21—(U.P.)—The War Production Board today authorized the manufacture of 691,018 passenger automobiles in the next nine months. It assigned quotas for this period to each of the 10 automobile companies.

General Motors Corp. received the highest quota. It was authorized to make 95,096 cars between July 1 and December 31, and 190,192 cars during the first three months of 1946.

Other company-by-company production ceilings, for each of the two production periods—the last six months of 1945 and the first three months of 1946—are: Chrysler—49,635 and 99,270. Ford—39,910 and 79,820. Studebaker—9,275 and 18,550. Hudson—8,000 and 13,602. Packard—8,000 and 12,118. Nash—8,000 and 11,550. Willys-Overland—8,000, and 8,000. Graham-Paige—8,000 and 8,000. Crosley—8,000 and 8,000.

WPB decided that 8,000 should be the minimum authorization for any company for each period. The total production authorized for the last six months of 1945 was 241,916 cars, and 449,102 for the first quarter of 1946. This amounted to almost 100,000 more cars than was originally estimated for the first nine months' authorization.

WPB pointed out that the overall ceiling on passenger car production is limited by the amount of steel that will be available without priority ratings.
