

DAM SEEN END OF SALMON IN ROGUE

Coos Bay, July 27—Construction of any large dam on the Rogue river as proposed by the federal government would, in the opinion of Kenneth Denman, Medford member of the State Game commission, virtually eliminate those waters as spawning grounds for salmon.

Denman made this statement at meeting of the Rotary club and Isaac Walton league Wednesday night. He stated that the fight between sportsmen and farmers and others wanting the dams for irrigation purposes is becoming an extremely hot issue along the Rogue.

The government has made surveys of approximately 33 dam sites on the Rogue.

AUSSIES PURSUE FLEEING NIPONS

Manila, July 27—(UP)—Australian troops pursued fleeing Japanese units today along the main highway northeast of Balikpapan, after RAAF Spitfires had intercepted one column and strafed 16 vehicles.

Gen. Douglas MacArthur's communique revealed that the enemy withdrawal apparently is being attempted by separate small groups rather than in one mass movement.

The Japanese radio was silent today on its reported invasion of Fuket, just off the west coast of the Malay peninsula. Yesterday radio Tokyo said 500 allied troops had landed on the island and that heavy fighting was taking place along the shoreline.

There still was no confirmation of this report from allied headquarters.

CALIFORNIA TO KEEP NEWCOMERS IS BELIEF

Sacramento, July 27—(UP)—The high prices and ready market for smaller homes in California indicate that "a large percentage" of persons who have entered the state since the war began are here to stay, State Real Estate Commissioner Hubert Scudder said today.

Prices for smaller homes in some cases have more than doubled during the war period, Scudder reported.

"It is not uncommon," he said, "to find a home selling for \$7,500 and \$8,000, the top price of which would have been \$3,500 four years ago."

KEEP THE JAPS IN THE DARK!

THE BIG PUSH IS ON IN THE PACIFIC....

Many of our fighting units from Europe are being transferred to the Pacific via the U.S.A. Most of them specialize in certain types of warfare and where they are going will be a clue to our plans.

TALK IS A MAJOR WAR PROBLEM. The discussion of war information by well-meaning, but thoughtless, Americans has sunk American ships... tipped off the Japs where our attacks would be made... warned them of secret weapons we would use.

Little facts betray big secrets. The whereabouts of one man can locate a division. His date of departure can disclose the sailing of a ship or convoy. His equipment can disclose where he is going, his training, the type of operation planned. The Japs gather every scrap of information, sort it, study it to learn our plans.

Are There Japanese Agents in America?

YES! Jap spies have been caught red-handed. With our many thousands of miles of border and seacoast, it is impossible to completely prevent the entrance and exit of enemy agents.

Do They Look Like Japanese?

NO! Too many people assume that they do. The Japs know that any agent who looks Japanese would be under immediate suspicion. They hire people of other nationalities, including Americans, to do their work.

Are German Agents Now Working for Japs?

YES! The Japs are desperate for information that will help save off our final knockout blows. They will pay any price. German agents cut off from their own country are now operating for the Japanese.

Is Information Getting Out of This Country?

YES! The Japs knew about the B-29 bomber six months before it was taken off the secret list. Time after time known leaks of information here have resulted in Japanese action that showed their immediate knowledge of facts.

LOOSE TALK DOES REACH TOKYO LET'S STOP IT!

DON'T TALK OR WRITE ABOUT...

- 1 Locations and movements of men, ships and materials within, to, or from the Pacific-Asiatic area.
- 2 New weapons, even though you know they have been used against the enemy, unless officially released by the Military Services.
- 3 Military information gained in confidence.
