## Amazing Discovery in a Hearing Aid

A big improvement has been made in a hearing aid now welcomed by thousands. It is a new hearing aid that does not require separate battery pack, battery wire, battery case or garment to bulge or weigh down. So small it fits the palm of the hand. About one-half the weight and bulk of most hearing aids. The tone is natural, noiseless, clear and powerful. The makers of Beltone, Chicago 7, Ill., are so proud of their achievement that they will gladly send free descriptive booklet and explain how you may get a full demonstration of this remarkable hearing device in your own home without risking a penny. Write them today.
