## MEDFORD MAIL TRIBUNE

Fortieth Year MEDFORD, OREGON, WEDNESDAY, OCTOBER 10, 1945. NO. 171. United Press—Full Leased Wire

### JAP COMMUNISTS FREED BY YANKS PARADE IN TOKYO

Yell for Removal of Hirohito; Shift of Control to Common People Is Advocated.

Tokyo, Oct. 10.—(U.P.)—Hundreds of Japanese communists, including newly-liberated prisoners who had been jailed for as long as 18 years, marched through downtown Tokyo tonight waving red banners and shouting for the removal of Emperor Hirohito.

Tokyo, Oct. 10.—(U.P.)—Gen. Douglas MacArthur tonight banned all imports to Japan above amounts necessary to maintain a minimum living standard. MacArthur's directive restricted imports to commodities the Japanese "clear and completely demonstrated" could not be produced in Japan.

It came as Minister of Agriculture Kenzo Matsumura said in an interview that food riots would increase and the Japanese be reduced to making grasshoppers and acorns supplementary part of their diet "to prevent mass starvation."

Earlier communist speakers at the party's first rally in 15 years called for the emperor's removal and the setting up of a democratic regime in Japan.

Three hundred singing, shouting demonstrators marched down one of Tokyo's main thoroughfares past Gen. Douglas MacArthur's headquarters with banners which said "We want work. We want food. Banzai democracy."

Released communists and sympathizers repeatedly praised communism and democracy and called for a "shift of control of the daily necessities to civilians."

At MacArthur's headquarters the demonstrators cheered Kyu-ichi Tokuda, founder of the communist party in Japan, as he extended thanks for the release of political prisoners to an officer representing MacArthur's chief of staff, Lt. Gen. Richard K. Sutherland.

**Shock to Conservatives**  
The demonstration was entirely peaceable, military police failed to come as a shock to emperor-worshipping conservative Japanese.

It took place only a few hours after the release from Fuchu prison of 16 Japanese and Korean prisoners, most of whom had been in prison cells since their arrest in raids March 15, 1928, and April 16, 1929.

Meanwhile, Vice-minister of Education Seichi Omura was quoted in the newspaper Mainichi as predicting that the government will soon shake up Japan's entire educational system in an effort to eliminate militarism and promote democracy in the schools, once the fountainhead of Japan's armed forces.

Fist fights flared today as hundreds of pickets massed to keep Warner Bros. Studio at Hollywood, Calif., closed and prevent a break-through of workers. (Left) Pickets evidently came prepared for the fray docketed out in steel helmets to prevent being bludgeoned over the head. Dance Director LeRoy Prinz (right) evidently didn't use such foresight, and is shown as he was injured by strikers who beat him when he attempted to enter the studio.

(Aime Telephoto) Sheriff Biscailuz said that as far as the controversy between the strikers and the other crop is concerned, "I have no interest in it whatever." He said the 18 legal pickets should be protected.

### 200 Deputy Sheriffs Break Up Studio Siege; Arrest Pickets

Hollywood, Oct. 10.—(U.P.)—Two hundred deputy sheriffs, working with military efficiency, today smashed the five-day siege of Warner Bros. studio with a mass arrest of 600 strike pickets.

Aided by Burbank police, the deputies opened the picket lines, which since Friday have surrounded the studio, causing the greatest violence since an AFL jurisdictional strike started March 12 in the movie industry over the right to represent 78 set directors.

### BUS STRIKE END IS PARLEY HOPE

**By United Press**  
Possibility of an end to one major Pacific coast strike was indicated today when Pacific Greyhound officials and union representatives scheduled a meeting in an attempt to end a dispute which has tied up bus service in seven western states.

Meanwhile, a strike of 61,000 AFL lumber workers in the Pacific northwest entered its 18th day.

A union spokesman said 2,700 Greyhound employees would remain idle until a definite settlement was reached. The workers left their jobs at midnight Thursday, paralyzing service in California, Oregon, Nevada, Utah, Arizona, Texas and New Mexico.

Lumber—The CIO continued its efforts to secure injunctions seeking to prevent the AFL lumber and sawmill workers from picketing CIO-manned lumber mills. Lumber and box mill plants in Olympia, Wash., and Portland were scheduled to resume operations.

There was no rioting or fighting today, however, as the pickets submitted peacefully to arrest on charges of unlawful assembly and rioting. Warners last week obtained a temporary injunction limiting pickets to 18.

Members of Aeronautical District Lodge 727, AFL International Association of Machinists, promised to be on the film picket line 10,000 strong tomorrow morning as 50 of their members were among those arrested today.

Thomas McNeit, president of District 727, which represents workers of the nearby Lockheed Aircraft Corp., said the delegate body last night voted to give aid to the film strikers.

The strikers, who earlier this morning were singing "America" and "Star Spangled Banner," silently were herded into the Warner lot to be booked on the charges.

The pickets objected to being booked on Warner property. Police barred reporters and photographers. Studio officials watched the proceedings from the rooftops.

Sheriff Eugene Biscailuz ordered break-up of the siege after conferring with Gov. Earl Warren as to whether the state guard should be called out. Warren decided a state of emergency did not exist warranting sending the guard, and the sheriff decided to act.

Chief of Police Elmer Adams of Burbank mounted a sound truck to read provisions of the penal code regarding rioting and assembly, and declared this was an unlawful assembly.

"Heil Biscailuz," shouted the strikers, drowning out Adams' words.

Meanwhile, the National Labor Relations Board in Washington voted two to one that the 105 ballots cast in the May 24 election to select a bargaining agent for the set decorators should be counted.

The IATSE and producers had challenged 54 of the ballots, and the strikers, 51. NLRB officials in Los Angeles will canvass the vote at 2 p. m. tomorrow.

Sheriff Biscailuz said that as far as the controversy between the strikers and the other crop is concerned, "I have no interest in it whatever." He said the 18 legal pickets should be protected.

Still Some Steam  
"You remember what a terrible time we had the first two days after the Japanese folded up. Everybody had to blow off steam. Well, there is still some of the steam that wants to be blown off."

"And we still have a few selfish men who think more of their own personal interests than they do of public welfare. But they are not going to prevail. You are not going to let them prevail."

The President left by plane shortly after 2 p. m. (EST) for Washington.

**PRESBYTERIAN LECTURE IS CANCELLED BY STRIKE**  
Col. F. J. Miles who was to have spoken at the Presbyterian church this evening was unable to make connections because of the bus strike. The pastor, Harry Hansen, announced today that the meeting has been canceled.

In a long distance call to Rev. Hansen this morning, Colonel Miles stated that he was unable to make connections which would enable him to reach Medford in time for his scheduled address here.

Paris, Oct. 10.—(U.P.)—Joseph Darnaud, police chief in former Premier Pierre Laval's Vichy government, was executed at Fort De Chateillon today for treason. He was convicted by a French court Oct. 3.

### TRUMAN UTTERS SHARP WARNING TO SELFISH FEW

President in Kentucky Dam Dedication Speech Gives No Hint of Those Aimed At

Gilbertsville, Ky., Oct. 10.—(U.P.)—President Truman climaxed the dedication of the \$115,000,000 Kentucky dam here today with a sharp warning to "a few selfish men" who think more of their own gain than public welfare that they shall not prevail.

He gave no hint as to the identity of these "selfish men" but he said forcefully that the nation would not let them prevail.

"Now," he concluded, "let's all go home and go to work. Cut out the foolishness and make this country what it ought to be—the greatest nation the sun has ever shown upon."

**Extemporaneous Talk**  
The remarks were extemporaneous and came at the end of a prepared speech in which he supported anew a plan for extending the federal power, irrigation and flood control programs along the lines of the Tennessee valley authority to all of the big river valleys of the nation.

"We are having our troubles now," he told the crowd of thousands assembled at the base of the huge dam, newest dam in the TVA system of 26 such dams. "They are not serious—just a blow-off after a let-down from war."

"You remember what a terrible time we had the first two days after the Japanese folded up. Everybody had to blow off steam. Well, there is still some of the steam that wants to be blown off."

"And we still have a few selfish men who think more of their own personal interests than they do of public welfare. But they are not going to prevail. You are not going to let them prevail."

The President left by plane shortly after 2 p. m. (EST) for Washington.

**PRESBYTERIAN LECTURE IS CANCELLED BY STRIKE**  
Col. F. J. Miles who was to have spoken at the Presbyterian church this evening was unable to make connections because of the bus strike. The pastor, Harry Hansen, announced today that the meeting has been canceled.

In a long distance call to Rev. Hansen this morning, Colonel Miles stated that he was unable to make connections which would enable him to reach Medford in time for his scheduled address here.

Paris, Oct. 10.—(U.P.)—Joseph Darnaud, police chief in former Premier Pierre Laval's Vichy government, was executed at Fort De Chateillon today for treason. He was convicted by a French court Oct. 3.

**Atom Two Edged**  
Marshall said discovery of atomic power might prove man's greatest benefit or it might destroy him. But, he added development of aircraft, rockets and electronics hold almost as incredible potentialities.

Quoting Gen. H. H. Arnold, commander of the air forces, Marshall predicted that the next five years may set jet planes flying at 700 miles an hour at 50,000 feet altitude to strike targets 2,000 miles away. He said single bombs weighing 45,000 pounds—22½ tons—exist now.

"The security of the United States was saved by sea distances, by allies, and by the errors of a prepared enemy," Marshall said. "For probably the last time in the history of warfare those ocean distances were a vital factor in our defense."

"We may elect again to depend on others and the whim and error of potential enemies, but if we do we will be carrying the treasure and freedom of this great nation in a paper bag."

**Will Come Quickly**  
"It is obvious that another war would start with a lightning attack to take us unaware," he said. "The pace of the attack would be at supersonic speeds of rocket weapons closely followed by a striking force which would seek to exploit the initial and critical advantage."

"In good conscience this nation can take little credit for its part in staying off disaster in these critical days," he said. "It is certain that the refusal of the British and Russian people to accept what appeared to be inevitable defeat was a great factor in the salvage of our civilization. Of almost equal importance was the failure of the enemy to make the most of the situation."

Interrogation of captured German officers indicated the axis had no overall strategic plan, he reported. In fact, the axis existed only on paper.

**Italy Burdened Axis**  
Italy's entrance into the war was contrary to an agreement with Germany. Italy was a constant burden on Germany, Japan also apparently acted independently instead of under a unified plan.

Hitler's unorthodox methods at the outset won so many astonishing successes that his generals did not challenge either his fatal decision to invade Russia or some of his other disastrous choices.

Among the axis errors, Marshall listed:  
Failure to invade England after France fell in 1940, largely for lack of a plan.  
Germany overextended herself trying to save the Italians in the Balkans and Africa and suffered heavily when caught without a plan to resist the surprise allied landings in Africa.

Germany failed before Moscow in 1941 in the face of stubborn Russian defenses and lack of plans for a winter campaign. Marshall called the Moscow battle the turning point of the war.

**Hitler Blamed**  
Even after the Moscow defeat, he said, Germany might have saved something if she hadn't squandered her resources at Stalingrad and underestimated the Russian potential. Finally, Hitler blundered in attempting to stand against the allied landings in Normandy instead of falling back to a line deep in France as his generals advocated.

Japan during this time was trying to consolidate her dominance of Asia instead of plunging to meet the German forces driving eastward.

"The crisis had come and passed at Stalingrad and El Alamein before this nation was able to gather sufficient resources to participate in the fight in a determining manner."

"Had the U.S.S.R. and the British army of the Nile been defeated in 1942, as well they might if the Germans, Japanese and Italians had better coordinated their plans and resources and successive operations, we should have stood today in the Western Hemisphere confronted by a enemies who controlled a greater part of the world."

"Our close approach to that terrifying situation should have a sobering influence on Americans for generations to come."

### Pear Wrapper Is Sent From Guam

A wrapper which had once covered a Bartlett pear packed at the Crystal Springs plant in Medford was recently returned to the firm by L. C. Langston, Seabee stationed on the Island of Guam. On the wrapper Langston wrote "a touch of home."

Langston, son of Mr. and Mrs. J. C. Langston, 114 Tripp street, has been overseas for nearly two years and recently wrote home to say that he expected to leave Guam the middle of this month.

### NEW BUILDING TO HOUSE NASH AUTO DEALERSHIP HERE

Purchase of the lot on the northwest corner of Bartlett and Fifth streets to be used as the site of an automobile agency for Nash cars was announced today by Albert F. Clauss, former major in the army air corps and until his recent discharge, commanding officer of the Medford air base. The site was that formerly contemplated for a building for use as a Greyhound bus line terminal.

Clauss, who purchased the property from A. J. Farra of Medford, stated that leveling of the site has been started and that construction of the building would probably begin next week.

The building, 100 by 100 feet on the 100 by 150 foot lot, will be reinforced concrete throughout and designed on the most modern lines with the thought of customer convenience in mind, Clauss said. Special care will be given to planning the building for easy access, he declared. It is expected to be ready for occupancy by Christmas.

Before going into the army Clauss and his wife resided in Portland where he was engaged in the automobile business. Impressed with the climate of southern Oregon and with the people living here, the couple decided to remain after his release from the army, Clauss stated.

The real estate transaction was handled through the Mark Goldy agency.

### TWO INJURED IN AUTO ACCIDENT

Mr and Mrs. Sidney E. Hart, Tillamook, were slightly injured about 9 p.m. yesterday when the Mercury coach in which they were riding collided with a truck and trailer operated by Steve Smith, Brookings, on Blackwell Hill, about nine miles north of here on Highway 99. They were brought to Community hospital by a passing motorist.

Front end of the Mercury was badly damaged when the right front wheel locked with the front wheel of the trailer on a curve, state police who investigated the accident, reported.

### TAX REDUCTION IS RECOMMENDED TO AID BUSINESS

House Ways and Means Asks Bill Passage to Boost Consumer Power.

Washington, Oct. 10.—(U.P.)—The house ways and means committee recommended passage of its \$5,350,000,000 tax reduction bill today "to provide incentives for business to expand and to increase consumer purchasing power."

"Certain expenditures necessary after the end of the war, however, will keep federal revenue requirements at a high level during 1946 if a large deficit is to be avoided," the committee said in a report on its bill.

**Early Passage Hope**  
House leaders planned to bring the bill before the house tomorrow and hoped it would be passed by nightfall.

The ways and means committee said there will be a "sizeable deficit" for the 1946 calendar year and that only limited tax reductions could be made now. It suggested that "moderate tax relief for all groups would be preferable to the complete elimination of a few war-time taxes affecting only a relatively small number of taxpayers."

For individual taxpayers the committee has proposed increasing the exemptions from the three per cent normal tax and cutting surtax rates four per cent. That change would eliminate about 12,000,000 taxpayers from all liabilities.

The committee said those 12,000,000 "were added to the tax rolls only as a wartime measure, and with the end of the war this reason for retaining them in the tax base is removed."

**GI Returns With \$5,000 Bonus Plea**  
Washington, Oct. 10.—(U.P.)—A GI veteran just back from France asked congress today to give each discharged soldier \$5,000 to finance his return to civilian life.

Cpl. John Arrend, 40, Denver, Colo., told a senate finance subcommittee considering amendments to veterans legislation that \$5,000 would help overcome the feeling of insecurity most veterans have on their return.

**WOOLEN MILL SLATED FOR KLAMATH FALLS**  
Klamath Falls, Oct. 10.—(U.P.)—Western Co-Operative company will file incorporation papers within 30 days for a woolen mill to be built here, officials of the firm said today. Principals behind the venture were not disclosed.

It was stated 24 looms will be used to start and the company will manufacture such articles as blankets, suiting, yardage cloth, union suits and sweaters. Latin American and Scandinavian trade will be sought.

### NEWHOUSE TOYS WITH CUBS FOR EASY 9-3 WINDUP

Hank Borowy Wilts in First Frame; Attendance Richest in World Series History

Wrigley Field, Chicago, Oct. 10.—(U.P.)—The Detroit Tigers won the World Series today, defeating the Chicago Cubs, 9 to 3, in the deciding game with Hal Newhouser supplying the pitching wizardry, and his battery mate, Paul Richards, the hitting.

Given an early lead by his mates, Newhouser toyed with the Cubs and pitched only as good as he had to in winning his second game of the series against one defeat.

It was Fordham Hank Borowy who failed the Cubs today. The same Hank who had won two series games and who had led the Chicago drive to the National league pennant after he was purchased from the New York Yankees for \$100,000 in mid-season.

## Marshall Says U. S. Barely Came Through; Should Be Ready To Mobilize 4,000,000 Quickly

Washington, Oct. 10.—(U.P.)—Gen. George C. Marshall reported today that the United States barely squeezed through to victory in World War II and should be ready to mobilize 4,000,000 trained men swiftly in case war threatens again.

In a biennial report which doubtless will be his last as chief of staff, Marshall reviewed the most difficult war in American history and offered his recommendations for the future. He advocated:

1. Universal military training to provide a peace-time citizen army that can mobilize 4,000,000 trained men in a year at the first threat to national security.
2. An intensive program of scientific research and development to give the U. S. the best equipped and most modern fighting force in the world.
3. Own Experience Basis  
Marshall based his recommendations on his own 44 years of military service, the last six of them as chief of staff in active command of the army during its most trying time in history. He is expected to retire soon.

Although his report ostensibly was for the two-year period from July 1, 1943, to June 30, 1945, it ranged from the start of the European war in September, 1939, to final victory over Japan in August, 1945.

It was highlighted by these findings:  
1. When President Roosevelt declared a state of limited national emergency Sept. 8, 1939, we weren't even a third rate military power.

2. The treacherous Japanese attack on Pearl Harbor Dec. 7, 1941, found us still far short of adequate preparedness.  
3. The blackest days for the allied cause came in the summer of 1942 when Japan had conquered all of Malasia, occupied Burma and threatened India while German armies approached the Volga and Suez.  
4. Only the valiant stand of Britain and Russia in the face of almost certain defeat gave us the time needed to mobilize for the ultimate victory.

5. Enemy errors and the lack of a coordinated axis plan of action were of almost equal importance to the allied cause.  
6. Even with those aids it took complete mobilization of the wealthiest democracy in the world to achieve the ultimate victory.

7. Technological developments carry the threat that the next war, if it comes, will strike more swiftly and with fantastic scientific weapons.  
8. Eternal preparedness is the best guarantee of our future security.

**Draft Need Told**  
Marshall placed great emphasis on the need for a compulsory universal training program, so that all young men would be trained in the basics of military service and be capable of rapid mobilization in the event of a future threat to world peace.

He advocated one-year universal training for young men chosen through the processes of selective service. They would provide training for officers in handling large forces of men and be a source of volunteers for the national guard and the organized reserve. The national guard and the reserves, under Marshall's plan, would be composed largely of "graduates" of the universal year's training program.

The age of hemispheric security behind the oceans is ended, he cautioned. The atomic bomb, which we possess but others may match, is not the only thing we have to fear in the event of another war.

**Atom Two Edged**  
Marshall said discovery of atomic power might prove man's greatest benefit or it might destroy him. But, he added development of aircraft, rockets and electronics hold almost as incredible potentialities.

Quoting Gen. H. H. Arnold, commander of the air forces, Marshall predicted that the next five years may set jet planes flying at 700 miles an hour at 50,000 feet altitude to strike targets 2,000 miles away. He said single bombs weighing 45,000 pounds—22½ tons—exist now.

"The security of the United States was saved by sea distances, by allies, and by the errors of a prepared enemy," Marshall said. "For probably the last time in the history of warfare those ocean distances were a vital factor in our defense."

"We may elect again to depend on others and the whim and error of potential enemies, but if we do we will be carrying the treasure and freedom of this great nation in a paper bag."

**Will Come Quickly**  
"It is obvious that another war would start with a lightning attack to take us unaware," he said. "The pace of the attack would be at supersonic speeds of rocket weapons closely followed by a striking force which would seek to exploit the initial and critical advantage."

"In good conscience this nation can take little credit for its part in staying off disaster in these critical days," he said. "It is certain that the refusal of the British and Russian people to accept what appeared to be inevitable defeat was a great factor in the salvage of our civilization. Of almost equal importance was the failure of the enemy to make the most of the situation."

Interrogation of captured German officers indicated the axis had no overall strategic plan, he reported. In fact, the axis existed only on paper.

**Italy Burdened Axis**  
Italy's entrance into the war was contrary to an agreement with Germany. Italy was a constant burden on Germany, Japan also apparently acted independently instead of under a unified plan.

Hitler's unorthodox methods at the outset won so many astonishing successes that his generals did not challenge either his fatal decision to invade Russia or some of his other disastrous choices.

Among the axis errors, Marshall listed:  
Failure to invade England after France fell in 1940, largely for lack of a plan.  
Germany overextended herself trying to save the Italians in the Balkans and Africa and suffered heavily when caught without a plan to resist the surprise allied landings in Africa.

Germany failed before Moscow in 1941 in the face of stubborn Russian defenses and lack of plans for a winter campaign. Marshall called the Moscow battle the turning point of the war.

**Hitler Blamed**  
Even after the Moscow defeat, he said, Germany might have saved something if she hadn't squandered her resources at Stalingrad and underestimated the Russian potential. Finally, Hitler blundered in attempting to stand against the allied landings in Normandy instead of falling back to a line deep in France as his generals advocated.

Japan during this time was trying to consolidate her dominance of Asia instead of plunging to meet the German forces driving eastward.

"The crisis had come and passed at Stalingrad and El Alamein before this nation was able to gather sufficient resources to participate in the fight in a determining manner."

"Had the U.S.S.R. and the British army of the Nile been defeated in 1942, as well they might if the Germans, Japanese and Italians had better coordinated their plans and resources and successive operations, we should have stood today in the Western Hemisphere confronted by a enemies who controlled a greater part of the world."

"Our close approach to that terrifying situation should have a sobering influence on Americans for generations to come."
