# Here's the Newest Improvement in MOTOR OIL

## —a war-born inhibitor that holds oxidation in check

DURING THE WAR years this newly discovered oxidation inhibitor was in military service. It was helping to save our tanks and other fighting vehicles from lubrication failures that would have taken them out of action.

Now, at no increase in cost, you can have this war-born ingredient in your motor oil. Added to Golden Shell during manufacture, it fights the oxidation which results in sludge. It gives you an oil that stays free-flowing, in full. Added to one oil drain to the next.

As you know, gummy sludge means trouble. It sticks to bearing surfaces, offering little or no lubricating value, and preventing good oil from getting in where it's needed. When this happens, a big repair bill is brewing. So change now to new Golden Shell Motor Oil with oxidation inhibitor. Shell Oil Company, Incorporated.

Like oxidized rubber—Oxidized Oil is no good

Oxidation is "Bad News." It ruins your garden hose, fades your clothing, rusts your screens. Under extreme conditions of heat, moisture and acid-fumes inside your engine, motor oil also oxidizes. That's why Shell adds this new war-born inhibitor to Golden Shell Motor Oil... to protect it from oxidation, and thus protect you from unseen but dangerous sludge.

SHELL CREDIT CARDS ARE BACK. Honored at all Shell Stations in United States and Canada. Apply for yours at any Shell Office or Service Station.
