## TOP PERFORMANCE CALLS FOR LIGHT GRADE LUBRICANT

"Time to winter-proof your car, too!"

This is what Mobilgas dealers and vicinity. By this they mean that it's not only time to shake the moth balls out of furs and woolens, dig slickers from the closet and appraise the winter fuel supply, but it's time, they say, to check up and service the hot-weather-groggy auto and give it a chance to withstand bad weather driving ahead.

"Too few motorists," declares Claude Holmes, Mobilgas and Mobiloil distributor in this area, "realize the damage that can be caused by neglecting to service cars properly before rough winter weather sets in."

"It is particularly important that the proper weight lubricant be used that the season demands. Right now, before cold weather appears, a motor oil is required which will flow readily when the motor is started on cold mornings and gear lubricants are needed that will follow and cushion gears, make shifting easier and cut down strain and

drag. Heavy summer oils and greases may stiffen with the cold and afford improper lubrication of vital parts with subsequent breakdowns and repair bills.

"Car manufacturers—naturally intensely interested in the performance of their respective products—stress the need for periodic protective services such as repacking wheel bearings, changing transmission and differential lubricants and motor oil, chassis lubrication, flushing cooling system, renewing oil filter and generally checking and servicing other vital parts of the automobile.

"So you see that this seasonal check up of cars is important. This we call 'Winter-proofing,' and Mobilgas dealers are equipped to give this vital service which is a wise precaution to help keep your car on the job until new ones are available."

**VARGAS TO RANCH**  
Rio De Janeiro, Nov. 1.—(AP) Deposed former president Getulio Vargas left by plane today for Sao Borja, his ranch in southern Brazil, but hinted he may return to politics. Before leaving he told a United Press correspondent he was "going to take a much needed rest—two months sooner than I thought."
