

### MANY HAVE T. B. WITHOUT KNOWING STATISTICS SHOW

Statistics released by the public health service reveal that for every death from tuberculosis in a community there are about nine persons with the disease, five of them known, four of them unknown. Mrs. Dwight Findley, chairman of the Jackson County Chest X-ray committee, called attention to these figures yesterday, in urging all residents of this county to be X-rayed when the mobile unit arrives to offer this free public health service.

Taking the case of Jackson Co., she pointed out that there were eight deaths from tuberculosis here last year. This would indicate that there are 72 persons in this community who have the disease. According to the statistics 40 of these are known but there are 32 people with tuberculosis, who either do not know that they are ill or have failed to seek medical advice.

**X-Ray Best Weapon**  
The most powerful weapon in the detection of tuberculosis is the X-ray, discovered Nov. 1895 by the German physicist, Wilhelm Konrad Roentgen.

Assisting Mrs. Findley in the county drive to obtain X-rays of all adult men and women are Mrs. Robert C. Hart and Mrs. Kenneth Denman. When the mobile unit arrives to take the X-rays the following volunteers will assist the Jackson County Public Health association in handling the work: Mrs. Jack Walker, Mrs. Joe Hearin, Mrs. Bill Walker, Mrs. Allen Perry, Mrs. Dick Watson, Mrs. Glen Fabrick, Mrs. Wm. McAllister, Mrs. B. Hughes, Mrs. Walter Graff, Mrs. Ivan Harrington, Mrs. C. A. Sanders, Mrs. R. G. Phair.

The following Girl Scouts from Troop 7, Roosevelt school, assisted in folding application blanks and filling the envelopes mailed: Dianne Findley, Phyllis Morehead, Kay Durno, Patricia Lydiard, Pauline Hamlin, Marie Laird, Margaret Huson, Doris Byers, Nancy Jennings, Tammie Engameiner, Carolyn Coleman, Donna Johnston, Francis Thomas, Roma Liddel, Joan Dezell, Margaret York, Joyce Scott and Ann Hart.
