

Man Who Saw A-Bombs Work Warns World Of Destruction

By Charles B. Degges
United Press Correspondent
Washington, Dec. 7 — (U.P.) — A man who saw the atom bomb's work in Hiroshima and Nagasaki warned today that the world faces nightmarish destruction under death-dealing rays unless it finds immediate ways to control atomic energy.

Phillip Morrison, a nuclear physicist who served on an inspection mission to the atomized Japanese cities, said the atomic bomb was a "revolution in war" which made it imperative to prevent another armed conflict.

Chance To Build
"War can now destroy not cities, but nations," he told the senate's special committee on atomic energy. "We have a

NO DEFENSE
Los Angeles, Dec. 7 — (U.P.) — Conway W. Snyder, California Institute of Technology scientist who was instrumental in developing the atomic bomb, said last night that "there is no possible defense against the atom bomb and the nation which uses it first will win the next war."

Snyder, present at the trial of the bomb in New Mexico, said only one-tenth of an ounce of the six or seven pounds of uranium in the first bombs exploded. He disclosed that plutonium, the element now used as the active matter in atomic bombs, is being manufactured by the pound at Hanford, Wash.

"This radiation," he explained, "affects the blood-forming tissues in the bone marrow, and the whole function of the blood is impaired."

"The blood does not coagulate, but oozes in many spots through the unbroken skin, and internally seeps into the cavities of the body. The white corpuscles which fight infection disappear."

"Infection prospers and the patient dies, usually two or three days after the exposure."

News Behind The News

By Paul Mallon

Washington, Dec. 7 — An overabundance of misinformation about American foreign policy sprouts glibly in the daily news. It originates now and formerly in the thoughts of the left-wing (including new deal) groups and is designed to break the Truman-Byrnes policy in China, Iran, Europe and elsewhere in favor of Russia—or make the policy unpopular so it cannot be firmly pressed forward. A lot of Americans who are neither left-wingers nor communists are thus gradually being influenced in their thinking, particularly as to China.

The Hurley testimony that a state department official actually advocated arming the communists against our war ally, Chiang Kai-Shek, has current counterparts.

A FEW pickets proclaiming themselves to be "the communist party of the District of Columbia" (never before known here) walked up and down in front of the department for a day urging that Mr. Byrnes quit, the "marines" be recalled from China and the government stop supporting Chiang.

Openly, thus, the professed communists are advocating what the left-wing periodicals and congressmen are more subtly promoting with greater power and influence.

Now comes also Mrs. Roosevelt up to the fray. AP quotes her as telling an audience at Fort Devens:

"RUSSIA has not started any wars? Ask Finland. The Finns were called to the Kremlin in October, 1939, and a slice of their territory demanded in true Hitler style. When they demurred, Russian bombers swept over Helsinki, November 30, and later all others. Power-poor Finland, ere destruction, surrendered March 12, 1940.

How about Iran today? Persistently Russia has declined to allow Iranian troops into the Russian-occupied zone of their own country to stamp out a communist revolution; therefore, permitting the revolution to succeed, in expectation that a communist-controlled state will be set up there. Moreover this pressure is supposed to force out of office the resisting Iranian government so a Russian appeasement clique can take hold. Is this not aggression? War? Conquest? The families of those daily killed refute Mrs. Roosevelt.

I CANNOT ask: How about China? The martial clouds there suggest Russia is obliquely working against Mrs. Roosevelt and her peculiar befuddled school of Armenian thought—lately at least.

Stalin's soldiers have reached some sort of unreported agreement with China whereby they will hold on to the Manchurian cities until he can get big forces in there, thus keeping the Chinese communists from capturing them.

Furthermore Commissar Molotov insisted at the London conference the Chinese communists were not communists, but largely farm peasants led by bandits; and that Russia would rather have stability in China now (this from an official source off the record here.)

NOW I do not wish to place any stamp of my own belief or authority upon these Russian inferences which are at variance with "the communist party of the District of Columbia," Mrs. Roosevelt and left-wing and new-deal congressmen and periodicals. I merely say a variance exists, and that their campaign to bend or break the American policy is founded on complete factual delusions.

Personally, I believe their words show they are incapable of objective appreciation of the facts, but are guided in all their reasoning by the commie line domestically.

The American policy was simply stated in the Anderson letter by Mr. Byrnes, pointing out that we, as well as Russia, are under war obligations to clear Chinese territory of the Japs, and implying our assistance to Chiang will continue until China is cleared.

Thereafter, perhaps, the commies can come back and do in China what they are successfully concluding now in Iran.

One thing about Russian diplomatic technique proved by history is that it need never make simultaneous sense. It can violate the treaty Mrs. Roosevelt's husband wrung from Stalin guaranteeing the perpetual freedom and sovereignty of Iran; and simultaneously abide by its agreement with Mr. Roosevelt to join the defeat of Japan in China, even at the expense of communists there. It can break up the United Nations procedure for peace at London and then have its local party advocate ousting the American government in favor of Russia.

The left-wingers do not know communism, Marxism or Russia. They are being fooled, and are trying to fool us all.

IRAN TERRORIZED
Tehran, Dec. 7 — (U.P.) — A wave of terroristic activity was reported in northern Iran today, including assassination of the police chief at Tabriz.

Babson Discusses New Developments

New York, Dec. 7 — (Special Correspondence)—I am in New York calling on some of my optimistic friends who are hopeful of very good times just ahead of us. In addition to the usual arguments as to the tremendous backlog of orders, the billions of cash awaiting an opportunity to buy merchandise and the possibilities of atomic energy, they throw at me various other things upon which they have been working. Some of them—by no means all—I submit below:

New Ideas For Builders And Manufacturers
Builders may soon be discussing the merits of new "lumber" This will be made from pulp and perhaps from a mixture of excelsior and Portland cement. Also, a new cement is being developed for use in concrete flooring which will be as strong but much lighter in weight. It should reduce the amount of steel in buildings. There also is a possibility of concrete which will bend but not break.

Textiles will soon be treated with a wax emulsion which, when added to rinse water, makes clothing water-resistant. Also there is a new process which makes cotton fabrics proof against rot, fungus and mildew without changing their appearance. A new asphalt or oil treatment of sole leather, adaptable to cemented shoes, may greatly increase wear.

Housewives To Find More Foods Available
The packaging of frozen foods, which have become a "must" for many housewives, is due for a speeding up. Fishing vessels and slaughter houses will be equipped for the immediate processing and freezing of fish, meats and poultry. A new can, the sides of which are fiberboard and the ends tinplate, may revolutionize the frozen food industry.

Car and express will be dropped by a parachute shaped like half a baseball cover. So we may expect to have shipments delivered in an improved condition. An appliance manu-

facturer tells of an electric washing machine which, in addition to washing clothes, has attachments by which dishes may be washed, potatoes peeled, ice cream frozen and even butter churned!

Improved Transportation And Communications
A bus company operating here through my community has applied for a helicopter franchise helicopter, with a long fuselage motors, counterrotating blades and three road wheels. A PV-3 helicopter, with a long fuselage with a motor on each end, is now being tested by the Coast Guard and Navy. It carries 12 passengers. Regular planes are now being made to travel over 500 miles per hour at an altitude of 100 miles.

Printing is about to enter into a new field. One of the most recent uses for the process of printing is to print electrical circuits on heavy paper with lines of metallic, conductive ink, as a substitute for wires in low priced radio sets. Television, too, will soon become a part of daily living. One New York department store has announced that it is ready to install three television studios in its store.

New Invention Sweeps Fog Away
Britain has developed and used a method by which airfields are cleared of fog through the burning of many gasoline jets. The process is known as "FIDO" which means "Fog Investigation Dispersal Operation." Germany has hit upon a process for extracting ethyl alcohol from wood waste. Furthermore, we hope to preserve aquatic life through the use of a new method of disposing of paper-pulp-mill waste which will make these substances harmless.

Shortly after the first of next year I will make a much more complete summary of new developments which have gone forward during 1945. Returning veterans and others interested in getting into new fields of endeavor should watch for this review.

U. S. PLANE FOUND; 14 ABOARD DEAD
Buenos Aires, Dec. 7 — (U.P.) — The burned-out wreckage of an airplane, believed to be the U. S. army transport that has been missing since Monday with 14 Americans aboard, has been found in Argentina's Corrientes province with all its occupants dead, it was announced today.

The first official report received by Argentine authorities said search parties found the wreck 23 miles northeast of Pellegrini, in the wild Argentina-Brazil-Uruguay border country.

The missing ship carried a crew of five and nine passengers, including eight members of a U. S. army geodetic commission and an American diplomatic official. All were on their way back to the United States via Montevideo.

78 COYOTES TURNED IN FOR NOVEMBER BOUNTY
Records of the county clerk's office show that during November bounty was paid on 78 coyotes, not a large number in comparison with before Pearl Harbor years when it was not unusual for one hunter to bring in that many, and the monthly toll was around 200. The coyote bounty is \$3 and \$2 for bobcats. The coyotes have not been bothersome this year. Save for a few raids on turkey flocks they stay back in the hills.

BATTERING TIDES EBB ON CALIFORNIA COAST
Los Angeles, Dec. 7 — (U.P.) — Towering tides which have battered sidewalks, piers, houses and small boats for the last two days will gradually diminish in the next five days, Floyd Young, government meteorologist said today.

The high waves subsided somewhat yesterday, giving housewives a chance to sweep out debris.

With government aid, there will be more than 3,000 airports built in the United States by 1955.

DO THIS WHEN COLDS' COUGHS TIE KNOTS IN TIRED ACHEY CHEST MUSCLES
Rub Penetro on chest, throat and back to rest better, and to feel better. For Penetro (1) Eases that chest muscle soreness, helps break local congestion. (2) Relieves pain at nerve ends in the skin. (3) Loosens phlegm, coughing lessens as vapors help you breathe easier in seconds. You and the children will like Penetro. Grants ma's famous mutton suit idea made better by modern science. See Double supply box. Get PENETRO

Methodists Told Military Training Outmoded by Atom
Washington, Dec. 7 — (U.P.) — The Methodist church's commission on world peace told congress today that compulsory military training in the light of atomic warfare is as "obsolete as the shining armor displayed in London tower."

Charles F. Boss, Jr., executive secretary of the commission, testified before the house military affairs committee that a training program would not increase the prestige of the United States among foreign nations.

"We believe," he said, "the

Charles F. Boss, Jr., executive secretary of the commission, testified before the house military affairs committee that a training program would not increase the prestige of the United States among foreign nations.

"We believe," he said, "the

passage of peacetime compulsory training legislation would be bound to arouse fear of our power, and suspicion of our motives, in quarters where fear and suspicion already exist."

The committee is considering an administration-backed bill to provide for a one-year military training program for teen-aged youths.

WAKE WORKERS GATHER
Boise, Ida., Dec. 7 — (U.P.) — The Workers of Wake, an exclusive organization of civilian defense workers captured when the island fell to the Japanese, gather today for a national convention. Some 350 delegates were expected to attend the meeting, which organization officials hope will be the first of many annual conventions.
