**MALNUTRITION HERE!**  
It is not necessary to check over his records of European countries to find nutritional deficiencies. Malnutrition is basically responsible for a large percentage of the ills in this country. Look at the record of our young men examined by the selective service physicians before Pearl Harbor. Out of 2,000,000 men 45% were rejected because of physical or mental deficiencies. Of these deficiencies the great percentage was nutritional. Malnutrition is not prevalent only among the poor, for it may result from over-feeding as well as from insufficient food. A balanced diet in accordance with the requirements of your physical organism is the important thing.
