Let's talk turkey. Who should receive the benefits of improved methods when industry gets back into its peacetime production stride? Judging by their strike demands, UAW-CIO leaders seem to think that such benefits should go entirely to union members. They forget that it is important for consumers to benefit through reduced prices or greater values. This has the added advantage of increasing volume and thus expanding job opportunities. They forget too that improved production methods come largely from the use of improved machinery and tools supplied by the owners of the business. Over the years the automobile industry has grown and prospered and contributed substantially to the welfare of our country because it has adhered to the principle that customers, employees and investors must all benefit from improved methods. The decision on how best to distribute the benefits calls for experience, judgment and—above all—a primary interest in the welfare of all concerned. That's why such decisions must be left to management, which is equally concerned with the interests of employees, stockholders—and customers!
