

T.B. X-RAYS FIND 126 SUSPECTS IN TOTAL OF 2,708

First findings of the chest X-ray program, sponsored in Jackson county by the Jackson county Public Health association were reported to the association Thursday by Dr. A. E. Merkel, public health officer.

Of the 2,708 persons X-rayed by the Oregon Tuberculosis association technicians, 126 were asked to have large X-rays taken after the miniatures were read, Dr. Merkel stated. Of these 126 questionable or positive cases 30 large films have now been completed by the micro readers.

Findings Given
These are their findings: Six to be under continued observation; three old TB inactive; one known case; 12 non-tuberculous; five other findings; three early active tuberculosis.

There are 32 films in the hands of the micro readers, 20 persons have not been in to the

A mighty atom is your dime

Never a kitten will you find that isn't full of frolic. Never a colt will you see that doesn't kick its heels in air. Among youth of every kind children alone wear braces.

That doesn't seem right.

Yet, it's that way things will have to be so long as Polio can go rampaging through the earth... striking the innocent... laying a cold hand on every mother's heart.

So what are we waiting for?

To every American community at this season comes the March of Dimes. This enterprise—so dear to the heart of President Roosevelt when he was alive—gives everyone a chance to join the fight on Infantile Paralysis.

This nation-wide institution has turned the dime into a Polio-smashing atom. It has made possible a chain reaction whereby one dime-atom adds its force to that of another... in thousands... in millions. Whether you give one dime or a handful, the March of Dimes helps loose a tremendous force against The Enemy.

Let none forget, either, that the long, long struggle to conquer Infantile Paralysis is still far from won. In only three other years, reports the National Foundation, has this country had a worse visitation than in 1945.

That's why new thousands of American children cannot kick their iron-clad heels. That's why they cannot—as every child should—be as playful as a kitten.

That's why, dear Mister, you can spare a dime!

Health department for their large X-rays, nine persons have not been in who had unsatisfactory miniature films, four persons have not been in who have troubles other than tuberculosis.

When the miniature X-rays were read 80 were found to indicate questionable or positive cases of tuberculosis and 47 other conditions not tubercular which should have attention.

Unit Return Asked
Requests for an early return to this county of the mobile X-ray unit have come in from all communities, Dr. Merkel stated. The public has certainly welcomed the project with enthusiasm even greater than that anticipated.

Praise for the corps of workers who put on the campaign was voiced by Mrs. Elwood Hedberg, association president. She reported a total of \$5,564.29 received to date in the annual Christmas seal sale, which finances this work, and urged all people who have not responded to the seal sale to do so as quickly as possible.
