## Your Health and It's Care

By DR. WILLIAM BRADY M.D.  
 Readers should address inquiries to Dr. William Brady,  
 265 El Camino Beverly Hills Calif.

COME ON NOW, A LTOGETHER, O.O.

Please send your treatise on Bed Wetting. My grandson aged eight began wetting the bed after an attack of measles when he

was four years old, and it is now a great embarrassment. If the treatise is as good for grandchild- ren (please, folks, remember to inclose a stamped self addressed envelope if you ask for the pamphlet) as your Invitation to Somersaultauqua is for grand- parents, it will be another red letter day in our lives when we receive it. We turn a few first thing every morning and it is great fun! (C.E.D.)

I inclose a stamped envelope bearing my address, in which please send me the Iodin Ration pamphlet. I am one of those cold fishes you mentioned recently. Saturday of this week I'll be 82 years of age. I still turn somersaults and cartwheels daily. Going strong. (C.B.J.)

Come, come, now, friends, we must not lose sight of our reputation. This column would have died long ago—I mean died to stay dead—had it not been for the faith a good share of readers always had in the probity of our teachings. We can't afford to shake their confidence now. So, if you don't mind, Mr. C.B.J., we'll settle for your regular morning rolls, without the cartwheels. Frankly, Sir, and just between ourselves, the picture of a lad of your age turning cartwheels along the hallway or through the living-room or in the bedroom (where in tarnation would there be room for such a stunt in the house nowadays?) is a little too much for even O' Doc Brady to believe without seeing it.

To the uninitiated reader past middle age it may seem incredible that any one except an athlete or an acrobat should turn a somersault under any circumstance at all, much less a half dozen every morning or at any

time of the day when he or she gets all balled up with problems or troubles or annoyances and needs a fresh start. But if so it is because the uninitiated reader accepts Webster's version and is unacquainted with my definition of somersault. What Webster calls somersault I call air-spring. Any one who turns or rather rolls a somersault Brady fashion never for an instant loses contact with the floor or ground.

On written request (not a clipping), if you inclose a properly stamped self addressed envelope of ordinary size (not a toy envelope) I'll send you an "Invitation to the Somersaultauqua," which tells how to roll 'em and why you should roll 'em regularly.

**QUESTIONS & ANSWERS**  
 You Need Not Only Iron I base by hearty approval of your teachings on my experience in mothering four children ranging from four to twenty-two years in age, all Brady babies. For financial reasons I've been one year without teeth. I feel I need iron as without teeth too often I skip the iron rich foods. (Mrs. M. D.)  
 Answer—You accept my teachings in reference to children but not in reference to the health, happiness and longevity of their Mom. I venture to say, Ma'am, that you need calcium more than you need iron. If you have already lost your teeth it is too late now to study Little Leagues. No 1—Save Your Teeth—although the booklet may help your children to save theirs. For a copy send twenty-five cents and stamped self addressed envelope.

**Psychogenic Vomiting**  
 Daughter, 26, appears healthy, but throws up after every meal. After all the tests, X-rays etc. at clinic they said it was nerves. She has done this about six years.  
 (Mrs. C. W. R.)  
 Answer—If you mean she is not emaciated or seriously weakened, the vomiting is probably psychogenic—caused by some mental, or emotional or psychic problem. A good psychiatrist (physician who limits practice to states of mind) can find a happy solution and get the girl back on a normal course.
