CAN'T KEEP GRANDMA IN HER CHAIR
She's as lively as a Youngster—Now her Backache is better.
Many sufferers relieve nagging backache quickly, once they discover that the real cause of their trouble may be tired kidneys. The kidneys are Nature's chief way of taking the excess acids and waste out of the blood. They help most people pass about 8 quarts a day.
When disorder of kidney function permits poisonous matter to remain in your blood, it may cause rheumatism, headache, neuritis, leg pains, loss of pep and energy, getting up nights, swelling, puffiness under the eyes, headache and dizziness. Frequent or scanty passages with stinging and burning sometimes show there is something wrong with your kidneys or bladder.
Don't wait! Ask your druggist for Doan's Pills, a stimulant diuretic, used successfully for millions for over 40 years. Doan's give happy relief and will help the waste miles of kidney tubes flush out poisonous waste from your blood. Get Doan's Pills.

Your Health and It's Care

By DR. WILLIAM BRADY, M.D.
Readers should address inquiries to: Dr. William Brady, 265 El Camino Beverly Hills Calif.

WE'RE ALL AFRAID AND MOST OF US ARE NERVOUS
Worry, anxiety, the jitters, dread, terror and horror are different degrees of the same emotion: fear.
Resentment, animosity, vexation, indignation, exasperation, rage and fury are different degrees of anger.
The individual animal or man confronted with a dangerous adversary or an unfamiliar situation that may be dangerous may either become angry and fight or try to remove or destroy the menace or seek safety in flight. This is the primitive physiology of the subject.
Even though the cultured man or woman remains apparently unruffled and impassive under vexatious circumstances where a lowbrow would bawl you out or maybe try to knock your block off the impassive one is by no means as calm and cool as he or she pretends to be. Invariably the heart beats harder, the blood pressure rises and the entire body machinery speeds up in preparation for the natural reaction to the emotion—fight or flight.

Dr. Brady
This racing of the engine uses up some of the energy mobilized by the emotion (increased adrenalin, increased oxidation of blood sugar) but hardly enough to blow off steam.
If the situation does not justify physical combat or action and does not permit immediate flight, then the man or woman who has to preserve a tranquil demeanor under all circumstances has constant need for some form of vicarious outlet for this mobilized energy—some kind of play, work or exercise every day, by way of recreation, relaxation and rest. He or she must DO SOMETHING, something fairly strenuous, something that will make him or her actually a little tired. If one can manage to get tired, not too tired, but just a little tired every day one will save much of the wear and tear to which the body machinery is subjected by these everyday emotions to which it is not permissible to react in the natural way.
The wear and tear is not so much on the nervous system, by the way. It affects chiefly the circulatory system, the heart and arteries. Most so-called "nervous breakdowns" are in reality cardio-vascular degeneration or disease—heart and artery wearing out.

A good many brain workers or white collar or professional or business people have learned that they sleep better if they take a good walk every day or every night, whenever it may be convenient.
To such people particularly I commend the health and efficiency value of a few miles of oxygen on the hoof every day.
