CARD OF THANKS
We wish to extend our heartfelt thanks and appreciation for the acts of kindness, messages of sympathy and beautiful floral offerings received from our kind neighbors and friends during our recent bereavement in the loss of our beloved husband and father, Mrs. Cary W. Culy, Mr. and Mrs. Ernest D. McIntyre, Mr. and Mrs. E. L. Pesse, Mr. and Mrs. Louis R. Culy, Mr. and Mrs. Omar Culy.

On the Side—By E. V. Durling
(Distributed by King Features Syndicate, Inc.)

Such is true love which steals into the heart, With feet as silent as the lightning down, A love that gives and takes, that sees faults, Not with fault-seeking eyes like needle points, But loving-kindly looks them down, With the overcoming faith that still forgives. —Lowell.

(We trust our feminine subscribers will give the above careful consideration and keep it in mind before subjecting their loving husbands to some too sharply worded criticism.)

When my good friend, Paul Reese, the genial Georgia sales manager, genius, stated only two new hotels, the Statler, Washington, D.C., and the Shamrock, Houston, Tex., had been built in the United States in the past 10 years, he certainly put himself too far out on the limb. He better start pricing stogies by the barrel. The following hotels have also been built within the past 10 years: Edgewater hotel, Madison, Wis.; Plymouth hotel, Fairfield, Me.; Mapey hotel, Re. no. Nev.; Terrace Plaza hotel, Cincinnati.

Horses & Women
Note it stated that "the most uncomfortable feminine fashion of the 20th century was the 'S' shaped figure calling for a straight front corset." I have no recollection of seeing females suffering from that fashion. Was before my time. But I do remember the hobbie skirt. If the "S" shape figure was more uncomfortable than the hobbie skirt it really must have been tough on the female of the species. What would you say was the most uncomfortable male style of the 20th century? I think it was the high choker collar.

Asking
Queries from clients. Q.—Was Jim Corbett a married man when he won the heavyweight title from John L. Sullivan? A.—Yes, sir. Your query inspires a couple of others for sports fans who consider themselves well informed to fool around with. How many heavyweight boxing champions were married men at the time of winning the title? How many were bachelors when they won the title and married men when they lost it? Q.—You are challenged to name a popular song written about Philadelphia, A.—Only one I can think of offhand is that quaint ditty titled "Between 18th and 19th on Chestnut Street." I believe there was in the very dim past a song titled "I'll See You in Philadelphia in the Morning." But on that I would not wager a stogie.

Money
When I see any price, salary, etc., quoted in British pounds I divide the figure by 2.80 to find the equivalent in dollars, two dollars and eighty cents being the official rate. However, I am informed British pounds are regularly sold in New York City for from two dollars and fifty cents to two dollars and seventy cents.

Scholars Organize
Nevertheless, more than 100 language scholars met in Peking the other day and formed the All-China Association for Reforming the Chinese Language, according to a Peking radio broadcast.

They will attack the problem on four fronts: Romanize the Chinese language and simplify the characters; find a unified dialect for all China based on the northern dialect; help national minorities reform their languages; and publicize their need for language reform.

10,000 Characters Needed
Although some scholars and intellectuals know 40,000 Chinese characters, only about 10,000 are necessary for ordinary day-to-day usage. Most vernacular newspapers confine themselves to the latter figure.

Contrary to popular belief, however, it is not the number of characters so much as the use of them in composition and the understanding of them in combination that makes Chinese probably the most difficult language in the world.

THIEF LIFTS ANCHOR
Monterey, Cal. (U.P.)—One thief, apparently wanting to do something "big," stole a 100-pound anchor from a boat moored near Monterey.

Babson Discusses 1951-52 Business
By Roger W. Babson

Babson Park, Fla., Jan. 27—(Special To Mail Tribune)—In my recent forecast for 1950, I stated that 1950 will be almost as good as 1949. This means that most industries and most localities will average nearly as well as for 1949. It is very possible—however—that 1950 may be the best year for some years to come.

It should be remembered that January 1949 enjoyed several stimulants which cannot indefinitely continue. For instance, 1949 benefited from a marked increase in military preparedness. Also, in 1949, the first installment of Marshall Plan aid—amounting to \$5,000,000,000—was sent abroad, much of which helped U. S. industries.

1950 will—however—benefit from the large amount of insurance money to be rebated to G.I. men. There will also be some other wind falls; but the European aid money will be less in 1950. The farmers will have less money to spend in 1950. All told, general business for 1950 need not be much below 1949. We surely live in a great country.

Great Need of Increasing Stimulants To Uphold Business
Readers should, however, realize the great need of increasing stimulants in order to hold business up to "normal" and prevent declines. Those who have administered to the chronic sick, know that in order for the patient to avoid more pain the dose of bromide must be increased. Those who depend upon liquor for a "lift" know that the amount used must be increased from year to year, in order to get the same results.

The above illustrations apply to U. S. business. It is not enough for the government to expend "as much" in 1950 as in 1949 in order to hold up business. The government or private enterprise must expend more in 1950 in order to prevent a decline. The republicans are wise in complaining about ever increasing expenditures and deficits; but in order to keep the national income up to the 1949 figures, it is not enough for Uncle Sam to contribute as much as in 1950 to the general welfare. He must contribute more than in 1949 unless the republican businessmen have more faith in the country and they themselves finance more new industries.

Policy of Going Into Debt Cannot Continue Forever
Of course there is a limit to all things. The present policy of going into debt to keep up the national income cannot continue forever. If oxygen is continually pumped into the business balloon, it will finally burst from over-pressure. If only the present amount is put into the balloon each year, the balloon will slowly become smaller. Hence, 1950 may be our best year for some time.

This is why I am advising readers to get out of debt during 1950. Neither jobs nor money will be plentiful in 1951 or 1952. Now is the time to save your umbrellas for the inevitable "rainy days". Pay cash for what you buy during 1950. Give your employer the best you can during 1950. Many careless workers will be paid off in 1951; you don't want to be one of these. Increase your savings during 1950 as you may need to draw upon them in years which follow. Explain business cycles to your wife and children. Get them to co-operate with you.

Don't Be Fooled By Fodder of Politicians
Don't let the politicians fool you. Most of them are not interested in your real welfare. They are interested only in getting re-elected. Moreover, the increase in salary which they voted themselves will make many of them in 1950 even more dangerous leaders than before. During these coming months too many of them will tell you anything to get re-elected. They will be giving you only temporary "pain killers". Don't be fooled by their harmful patent medicines.

Your hope and mine depends upon us doing more work and spending our money more wisely. There is no short cut to prosperity. Sooner or later we will learn that these politicians have been giving us only dope instead of an honest spring tonic. We need medicine which will make us produce more, so that prices can be reduced and false "prosperity" can be avoided. There is too much thought about getting free aid and too little about creating more goods. For prosperity to continue after 1950 we must have more religion and fewer handouts.
