OUT OF THE WOODS By Jim Stevens

Sawdust Walls Fred Cassidy—not Hopalong—has been having heating troubles all winter; as who hasn't? Fred deserves our aid and comfort, for he is one of the best friends going, to both writers and loggers. He is a crack salesman for a big book store, and this is a business that takes both words and trees, making jobs in the timber and at the typewriter. I hear from a neighbor of Cassidy's that he has a gas-fired furnace in his new home that cost him 60 hard bucks a month to fuel during the past six cold months. And now he is exploring all the angles on what to do about it before another cold season breaks.

Trip to Woodshed Probably Followed

Salem, Ore., Apr. 3—(U.P.)—The telephone operator heard a young voice scream Sunday night: "Give me the police department, quick!" A woman's scream was heard in the background. Then the connection was broken. The operator traced the call and relayed the information to police. Two squad cars sirened to the scene. Officers ran to the door and knocked. A woman answered. "Yes," said the woman, "my son called the police for help when I told him to brush his teeth before he went to bed. I screamed at him and cut off the phone."

Home Repairs Made Easy

At other times in this space I've enthused over \$7 worth of information for the house owner in a giant book put out by Doubleday. Mr. Cassidy sells it, I know, but I have a hunch he has never read it. He should do so now, turning to the heating section, where he will find that the first necessity for gas-fired heat is "a tight house." That means insulation to the utmost. And this, according to "Home Repairs Made Easy," means a basement snugged in with storm windows and doors and strip materials. If there is no basement, and if there is room to hunker up and hammer in the crawl space under the floor, then nail paper and shiplap to the joists from underneath. When the floor sits high on short studs that rise from plates on basement wall or foundation, paper and lumber sheeting are called for to make inside walls.

Severe Dust Storm Lashes at Prineville

Prineville, Ore., Apr. 3—(U.P.)—High winds whipped dust into Prineville Sunday from parched hinterlands. The Oregon Jersey club, which attempts to coordinate shows so that judges may attend, recommended the date.
