Leaf Roller Appearing In Strawberry Patches

Strawberry leaf roller moths are now starting to appear in the strawberry patches. These will be followed in a couple of weeks by a crop of the leaf roller worms. Shortly after these worms start to feed they spin a web and pull the sides of the leaves together with the webbing to form protection for them. After the leaves have been rolled it is very difficult to get control.

As the summer progresses, a second, and later, a third generation of moths will be produced and each one will be in greater numbers. If left unchecked, infested strawberry patches will be completely defoliated.

A spray applied during the next week would be a good start on the control of this pest. DDT will give good control and is perfectly safe to use at this time. If you have to buy a spray, then it would be preferable to buy methoxychlor. This is a relatively non-poisonous material and while it does not give quite as good control as DDT, you can keep on using it right up until a few days before harvest.

A pound and a half of either of these materials to 100 gallons of water is sufficient. For home gardeners this amounts to a heaping tablespoon in two gallons. The leaves of the plants should be thoroughly wet with the spray, and it would be desirable to make a repeat application about two weeks after the first one.

Jacksonville Man on Dairy Improvement Staff

Joseph Chabat of Jacksonville has been added to the staff of the Jackson County Dairy Herd Improvement association. Chabat and Hollis Hopper, who has been working for more than a year, will provide production records on milk and butterfat or cost records on feed for cooperating dairymen in this county.

The additional personnel makes possible the testing of double the number of herds tested previously. One dairyman milking 30 cows, who recently put his herd on test reports saving $85 a month on feed cost, at an outlay of $9 for the service.

Following is a list of the 10 highest producing cows on test for March in Jackson county and a list of the five highest producing herds:

Hallrose Sofie, 1860 pounds milk, 102.3 pounds butterfat, Far Hills ranch, owner.

TIMES CHANGED
