

Demos Say Support For Truman Better

Washington, May 20—(U.P.)—Democratic National Chairman William M. Boyle Jr., said today that grass roots support for President Truman's legislative program has increased during the past two years.

In the current issue of "Capital Comment," the democratic national committee's weekly newsletter Boyle cited the crowds who greeted Mr. Truman on his recent 6,000 mile coast to coast tour as evidence of this increased support.

Boyle said the trip "dramatized to the nation that the democratic party is always ready to report to the people directly, from our president on down, on what our federal government has done, and on what it proposes to do in the future."
